

VANTAiO

SAP Build Work Zone

Central entry point for
applications, processes &
information

Mainz, April 2024

What this presentation is about

Content & Overview

This presentation will give you an overview of the **SAP Build Work Zone** product, which can be used to create a future-oriented digital workplace in the SAP environment.

In addition to the advantages of SAP Build Work Zone, there is a clearly structured presentation of the **differences** between the "Standard" and "Advanced" editions.

SAP Build Work Zone

VANTAiO at a glance

Your #1 for digital workplaces with SAP

- › Extensive and **long-standing experience** (> 23 years) in the SAP portal environment
- › Provider of **software and solutions** that enable the optimal use of SAP Portal software in companies **since 2003**.
- › Intensive focus on a **high user experience** of the software ("Only use generates benefit").
- › Over **350 customers** and experience from **> 600 SAP projects**: Reference customers from many different industries and different company sizes.
- › Efficient **support organization** and supplementary **professional services** for smooth operation of our solutions.
- › Company locations: Mainz and Siegburg

Our claim: **Simple** implementation of complex requirements

Efficient. User-centered. With SAP.

“

VANTAiO always focuses on customer benefit. With practical solutions based on SAP.

**MARKUS MARENBACH,
MANAGING DIRECTOR**

“

With VANTAiO, you can rely on over 20 years of experience with digital workplaces with SAP.

**STEFAN BOHLMANN,
FOUNDER**

Good customer acceptance on the market

Project examples with SAP Work Zone

INTERSPORT Germany operates a messaging system based on **SAP BTP** for all employees of the approx. 1.500 INTERSPORT stores in Germany.

FFT uses the SAP Work Zone for its **process-driven application** portal. Various SAP technologies, including on-site, are **integrated** into the system.

The DRK NSTOB uses the new SAP BTP platform for a **communication and messaging system** for mobile blood donation staff and at the head office.

Based on the SAP Build Work Zone Advanced Edition, ILLIG has created an innovative **digital workplace** that focuses on information and digitalized processes.

Digital working - basic approach

There are 2 types of "digital working" in companies

Blue Work

Formal part of work performed by humans and supported by various digital technologies (workflow, automation, AI, etc.).

- › Formal, fixed
- › Repetitions
- › Rules and structured data
- › Standards, processes
- › How does it work?
- › Routine and efficiency
- › Goals

Red Work

Very dynamic, agile, lively part of the work that can only be done by people and through collaboration.

- › Dynamic
- › Surprise
- › Basic principles
- › Experts
- › Who can do it?
- › Communication

Digital working - different environment & content

Various service categories are required

SAP Build Work Zone

The new, central entry point for applications & more with SAP!

SAP Build Work Zone enables companies to easily set up **digital workplaces** to increase user productivity and engagement. It centralizes access to relevant business applications, processes, information and communication in a single entry point that can be accessed from any device.

The screenshot displays the SAP Build Work Zone interface. At the top, there is a navigation bar with the 'your Logo' and search bar. Below this, the 'Meine Anwendungen' section features several tiles: 'Nachrichten Übersicht' (15), 'Wareneingänge' (7), 'Systemmeldungen' (6), 'Stellenanzeigen' (7), and 'Redaktionscockpit' (68). The 'Meine Nachrichten' section shows four news items: 'Entscheidung gefallen: SAP Success Factors wird das neue HR System', 'Bestellungen: Filterung nach Mitarbeiter ID', 'VPN-Verbindung unterbrochen', and 'Jobrad - Ein voller Erfolg'. The 'Meine Cards' section includes a bar chart for 'Projektzusammenfassung - Allgemeine Kosten', a donut chart for 'Gesamtbestellwert nach Produktkategorie', and an 'Onboarding' checklist. At the bottom, there is a 'Watchlist Projektbesetzung' table and an 'Invoice Genehmigung' card.

Projekt	Kunde	Stellenbesetzung	Status	Stellenbesetzung
5000010050	Robert Brown Entertainment	29	In Bearbeitung	33%
5000010051	Entertainment Argentina	30 230	Abgesagt	0%
5000010052	Brazil Technologies	12 69	Verspätet	33%

2 editions:
Standard &
Advanced

SAP Build Work Zone

Provide users with a consistent, intelligent working environment

Centralized access
to applications, messages,
information, documents and
tasks

Find
company-relevant
information **quickly** using the
search function

Stay informed
with company updates and
seamless integration of SAP
content or third-party
applications

Execute tasks easily
with the help of standardized
SAP Task Center workflows

Interactive workspaces,
forums, feeds and knowledge
base articles

Flexible working
from anywhere, at any
time and on any device.

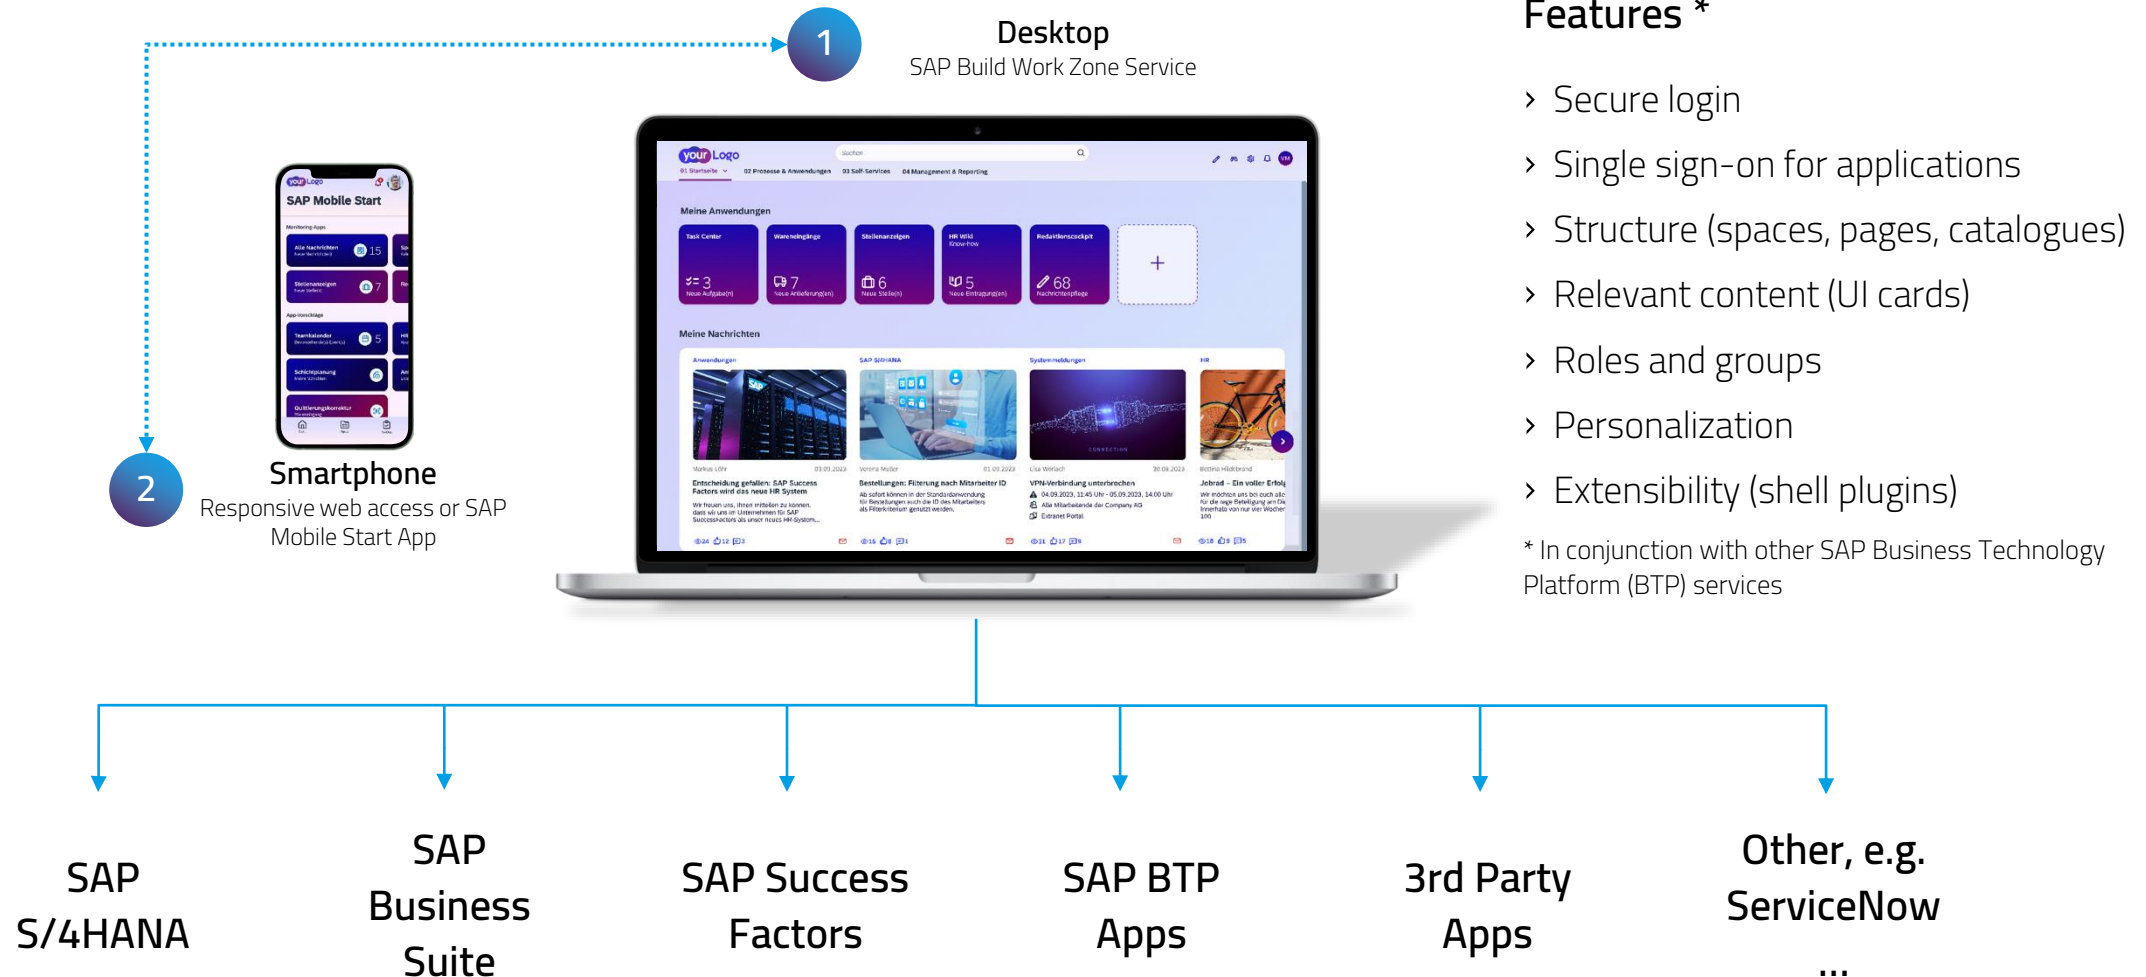

**Retrieve reports
and notifications**
embedded in the
respective context

Becoming more efficient
when creating and
publishing content

SAP Build Work Zone

Access via desktop & smartphone to SAP & non-SAP

Two editions available: Standard & Advanced

Which variant of the SAP Build Work Zone is right for you?

Standard Edition SAP Build Work Zone

- › Adjustments by **administrators**
- › 2-level navigation: **areas & pages**
- › Individual design + custom integration cards + expansion options
- › **No web content management system**

Advanced Edition SAP Build Work Zone

- › Customization by **editors** including **web content functionality**
- › More complex, **deeper navigation structures**
- › Individual design + custom integration cards + expansion options
- › **Work areas** for collaborative project work
- › Prefabricated **content packages**

STANDARD
EDITION

SAP Build Work Zone „Standard Edition“

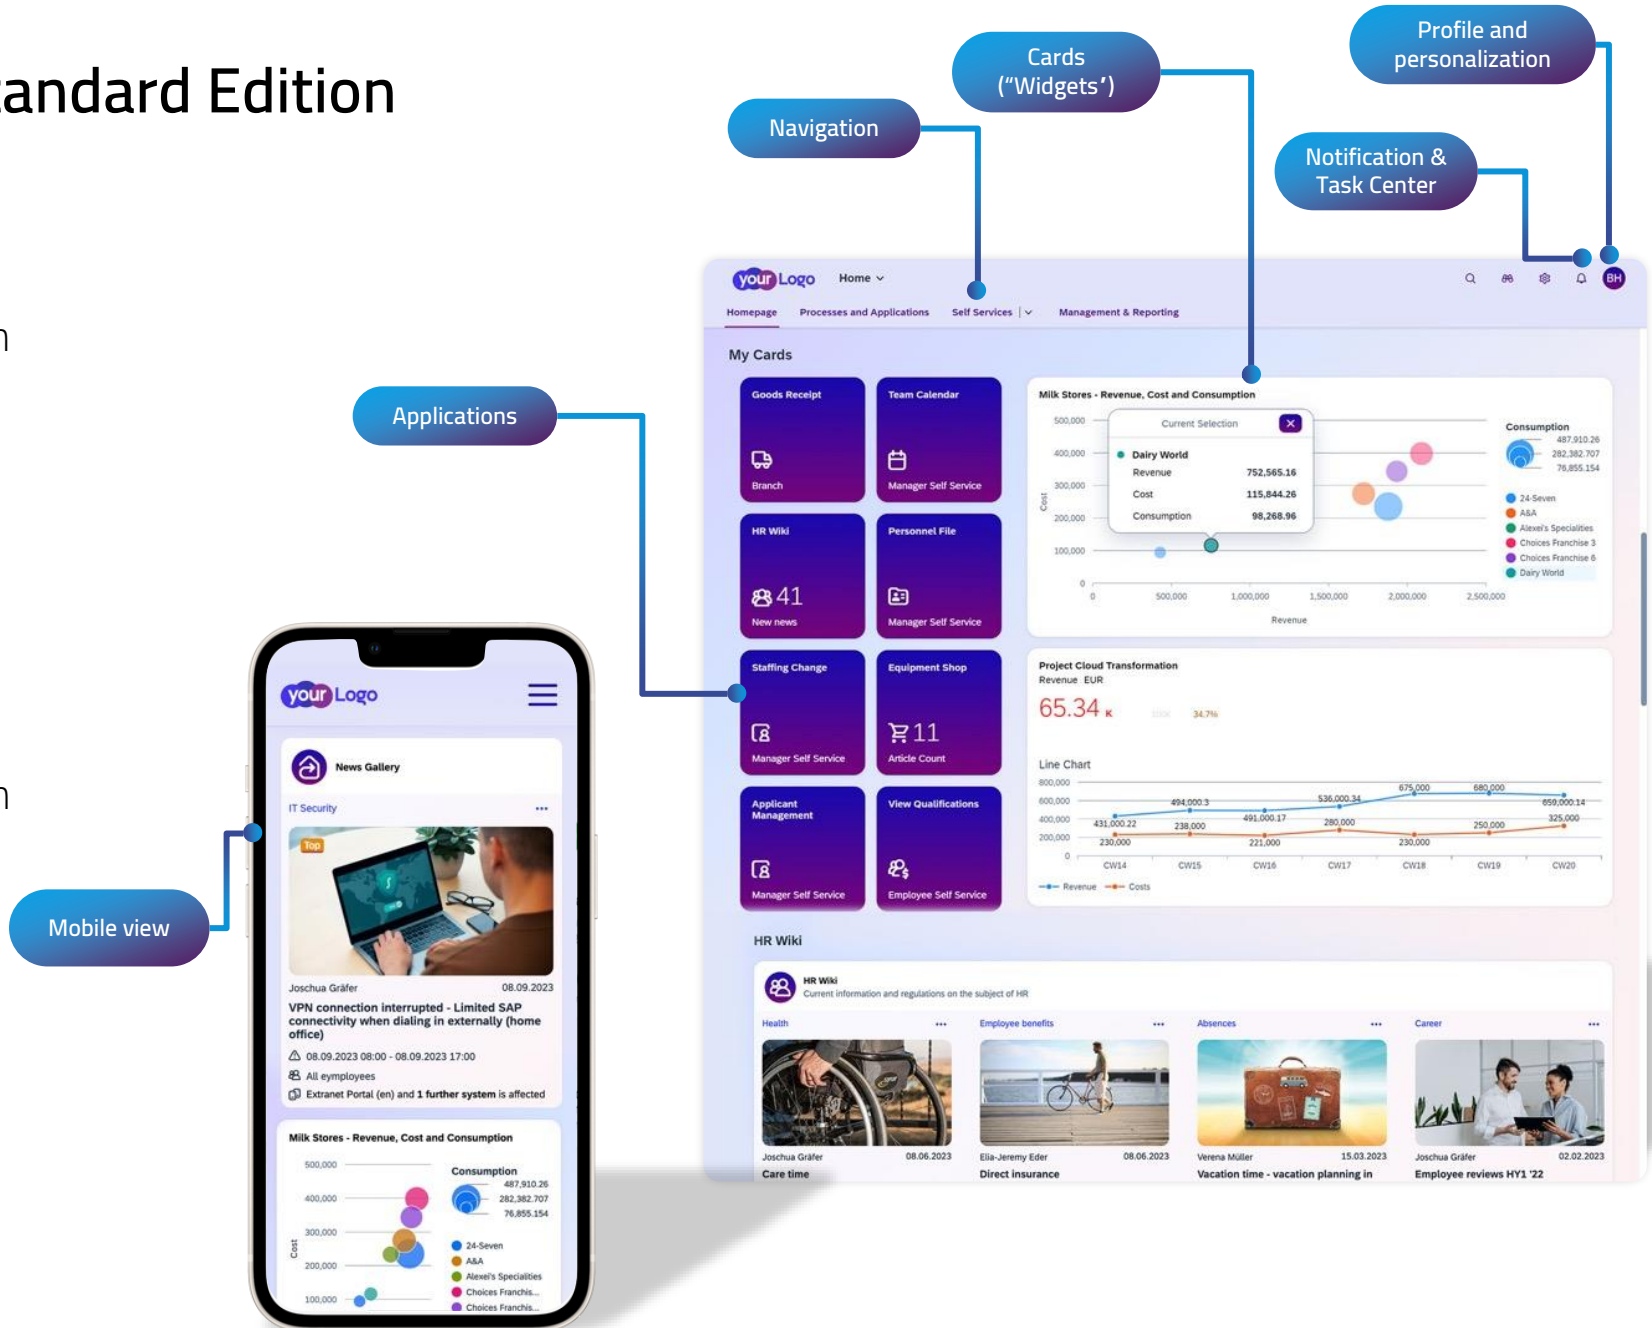

How the SAP Build Work Zone ensures
greater productivity in everyday working life

SAP Build Work Zone – Standard Edition Overview

SAP Build Work Zone - Standard Edition enables companies to easily set up digital workstations, especially with a focus on applications.

This allows users to increase their productivity and save valuable working time using the device of their choice.

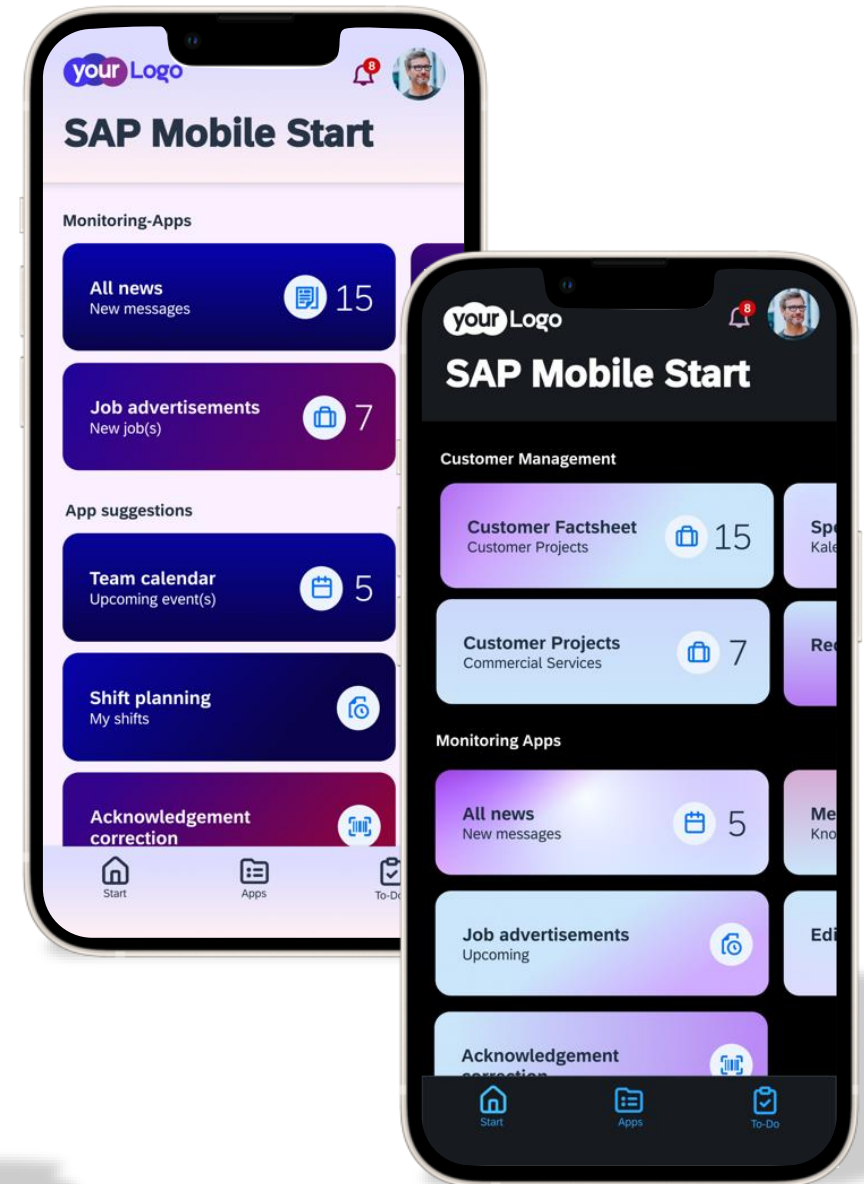

SAP Build Work Zone - Standard Edition centralizes access to relevant business applications and processes in a single entry point.

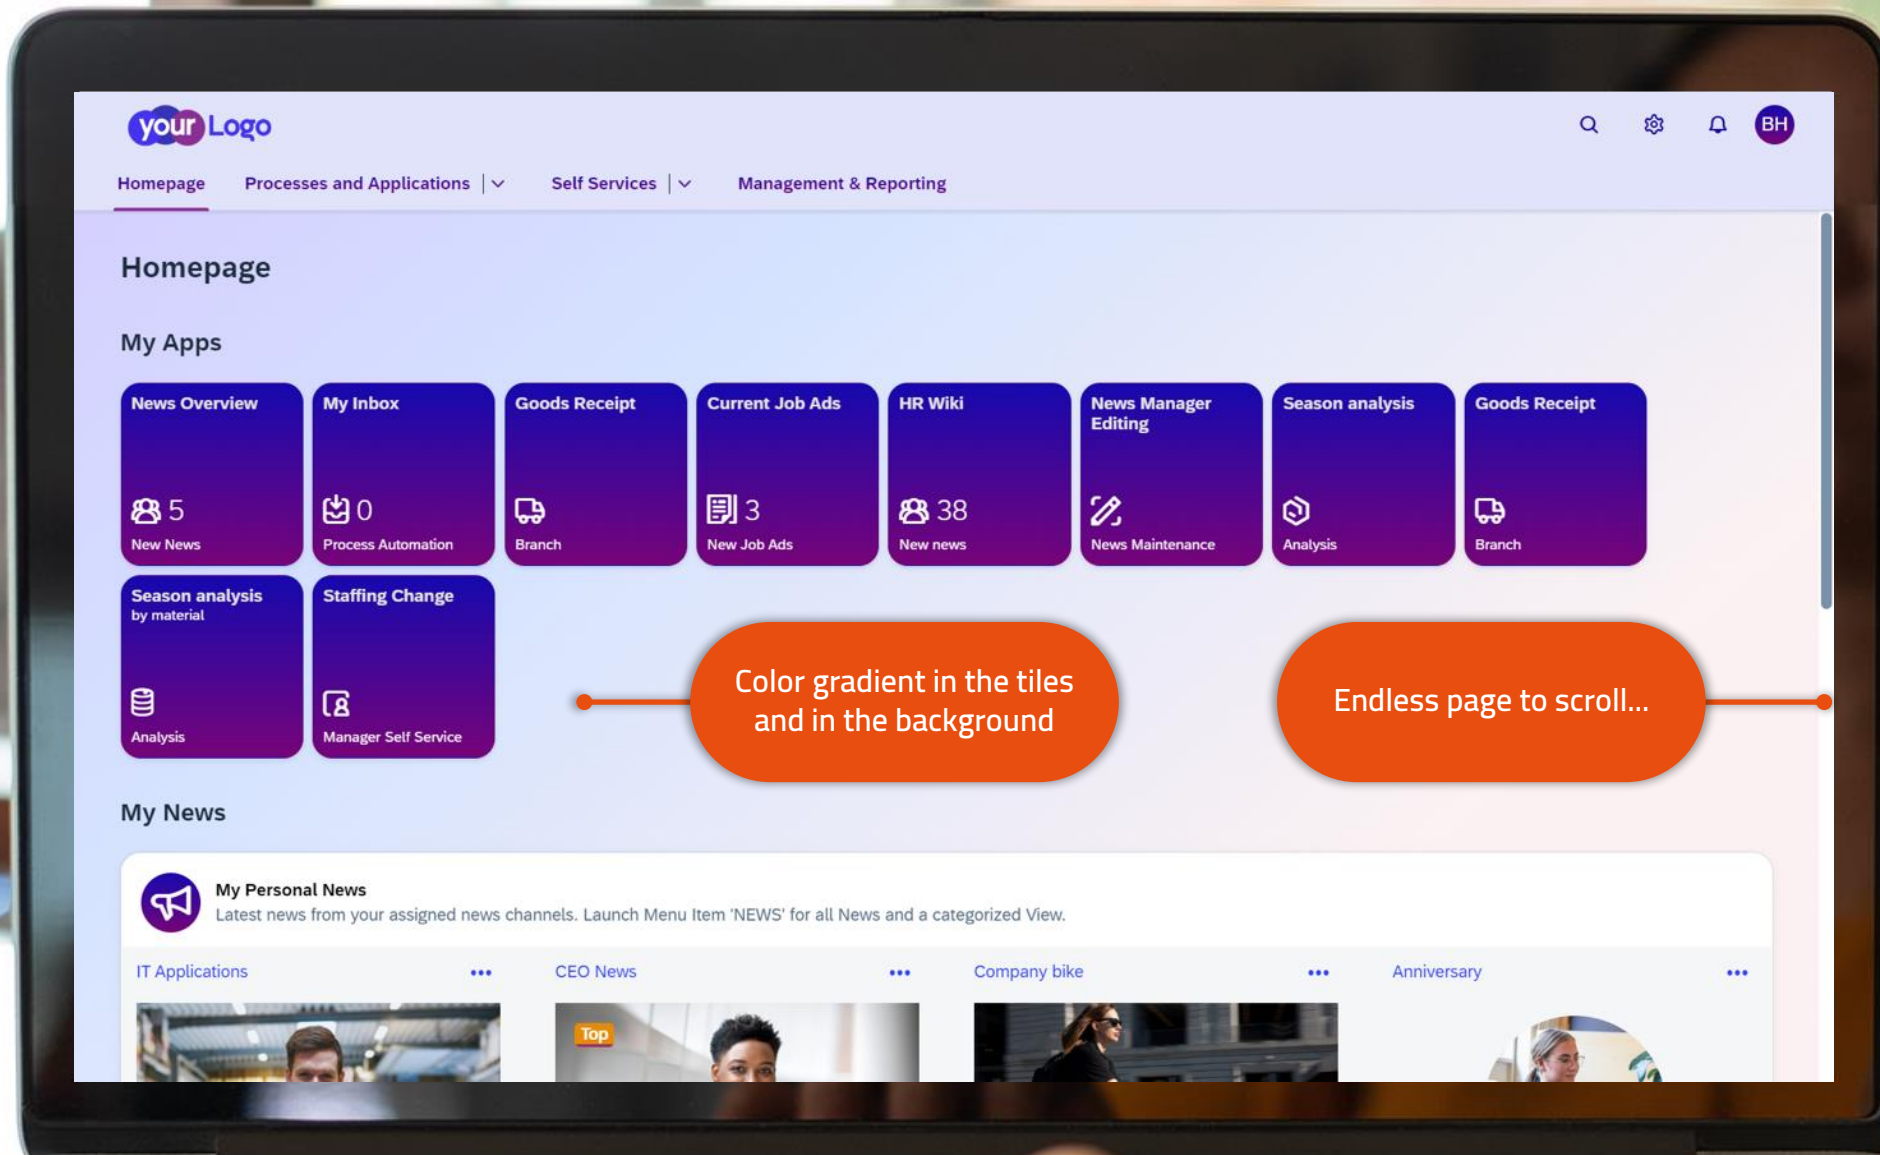

SAP Build Work Zone – Standard Edition App – SAP Mobile Start

The "SAP Mobile Start" app is already included in the license scope of SAP Build Work Zone (Standard Edition) and can be linked to the Work Zone on the desktop via QR code (in the user profile settings).

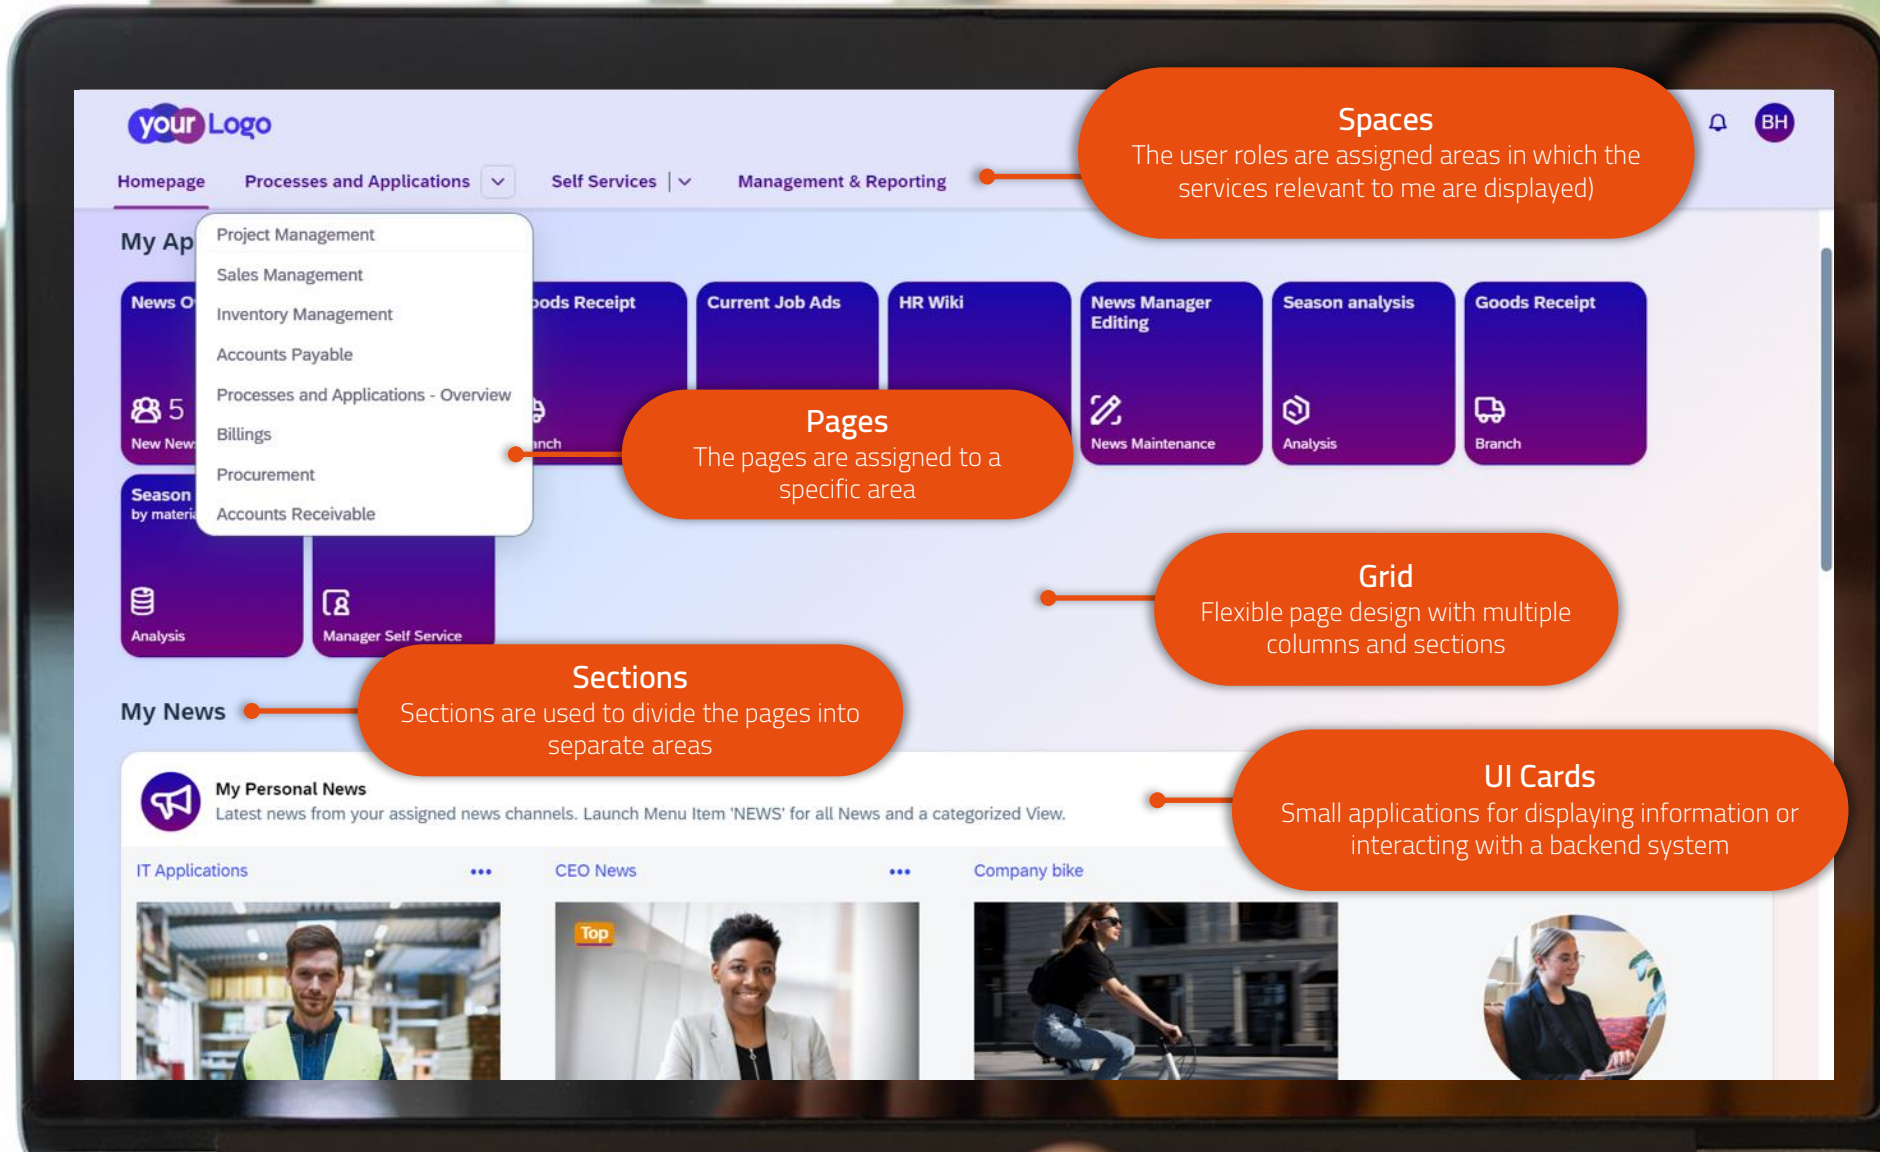

- › **Native App**
Available for iOS and Android devices in the respective stores, for download as a native app. This means that Faced-ID can also be used for authentication, for example.
- › **Plug & Play**
Simple connection with SAP Build Work Zone - Standard Edition via QR code
- › **Tasks Inbox**
Approval of tasks on the mobile device through connection to the SAP Task Center
- › **Expandability**
Easy expandability with widgets on the start page

Home page

- › Logo and color scheme customizable via theme editor or CSS
- › Recommended after SAP updates: **Quick UI Check**
- › Automatically also used for the **mobile view**
- › Pages can be of any **length** and can be equipped with several UI Integration Cards

Spaces

The user roles are assigned areas in which the services relevant to me are displayed)

Pages

The pages are assigned to a specific area

Sections

Sections are used to divide the pages into separate areas

Grid

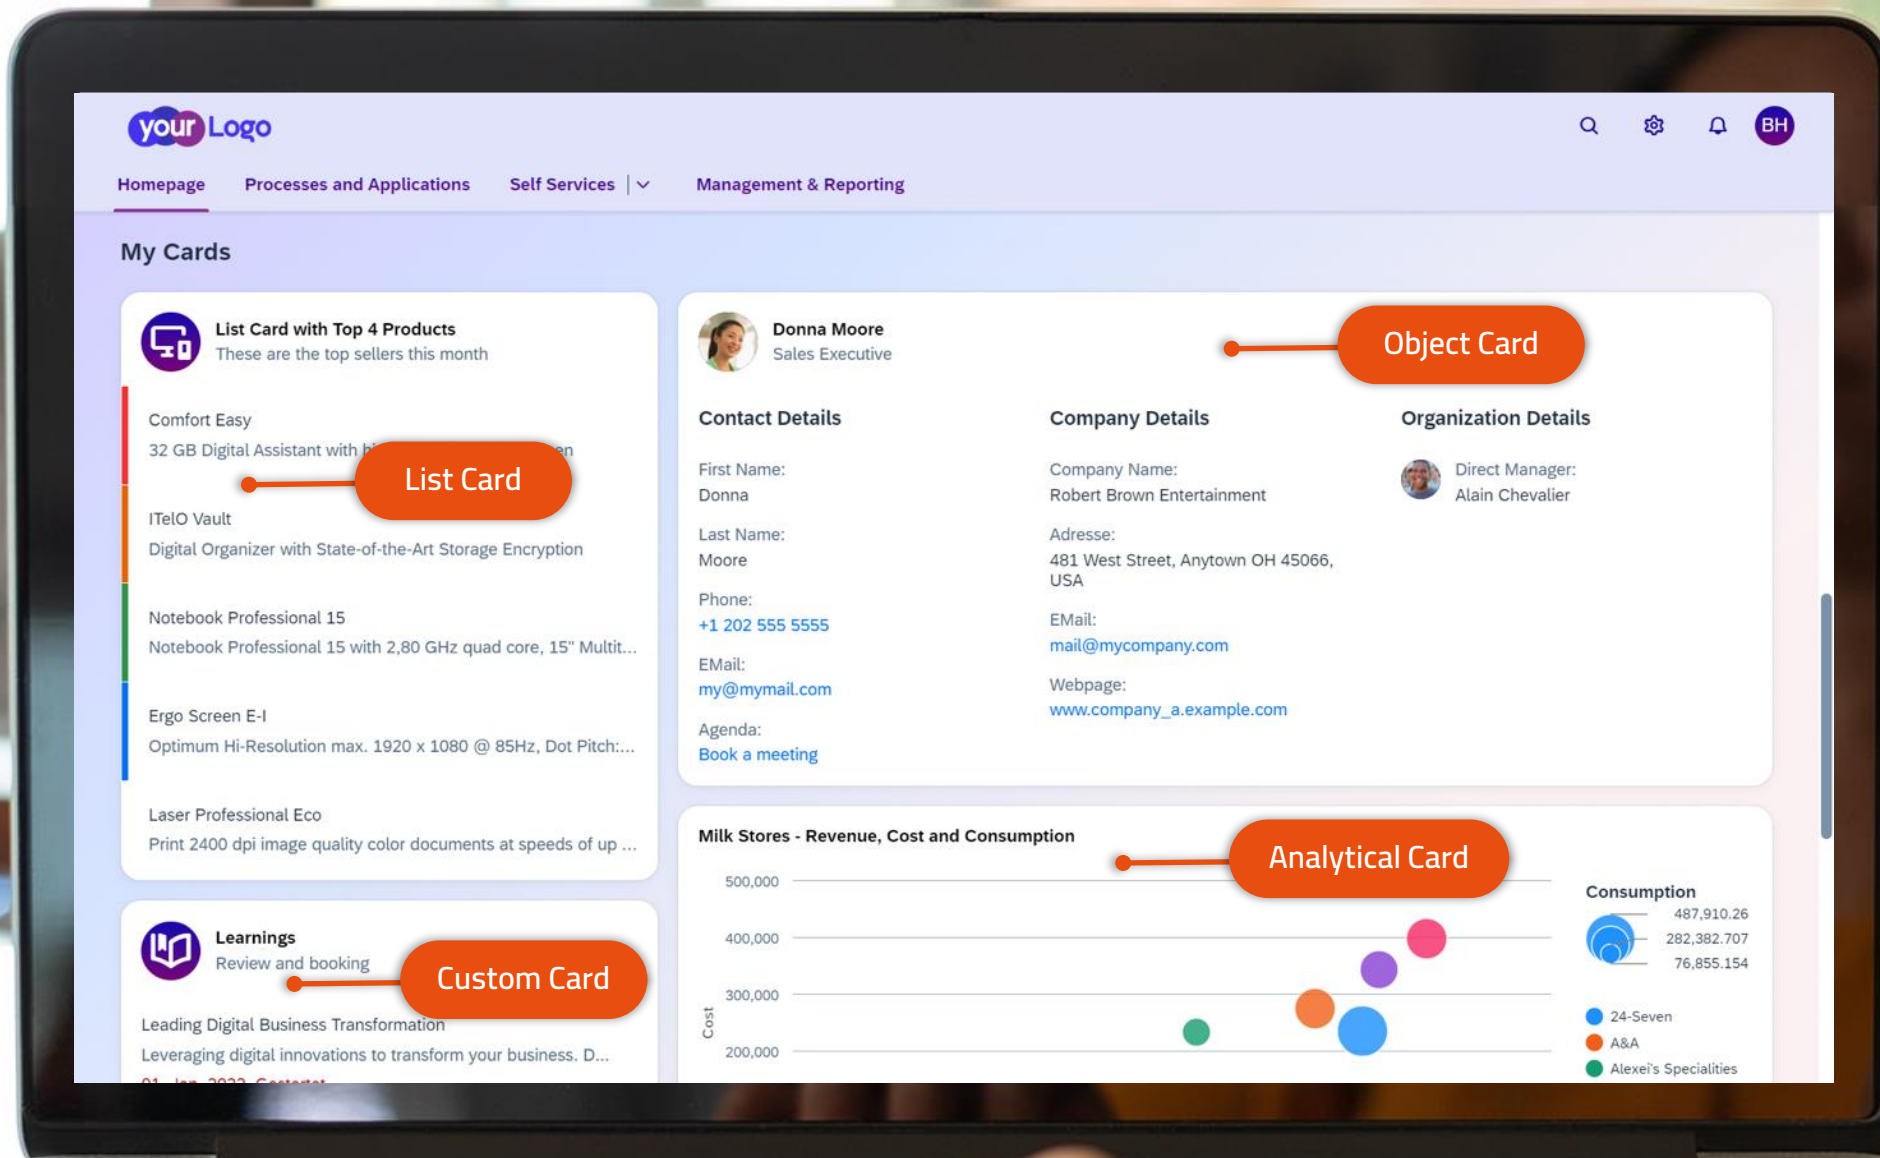

Flexible page design with multiple columns and sections

UI Cards

Small applications for displaying information or interacting with a backend system

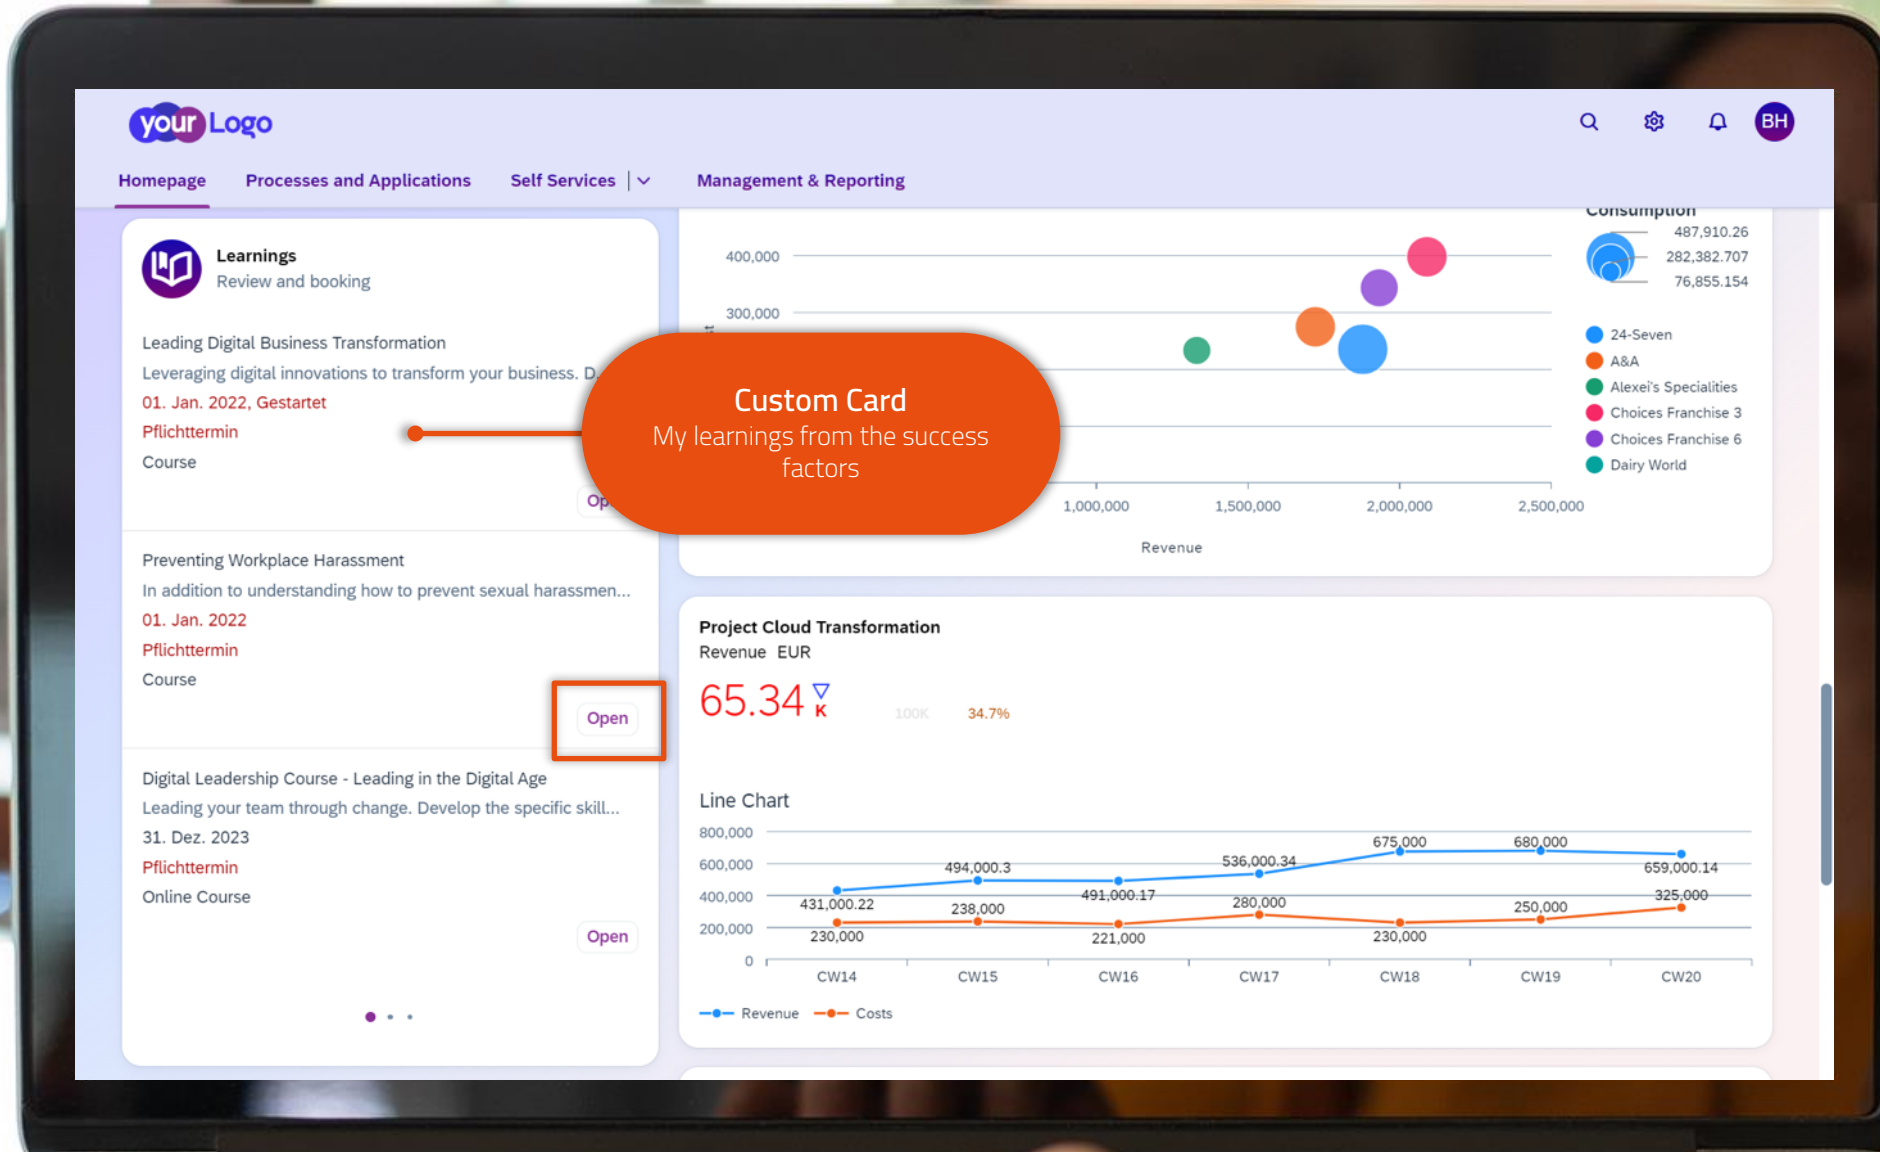

Structure

- > The **number** of spaces and pages is not limited (max. 7 spaces per user are recommended)
- > The **grid** is very **flexible!**
- > **Personalization** takes place at Space level

UI Cards

- › There are different types of UI integration cards.
- › Cards can be controlled via roles depending on authorization.
- › The card can behave differently depending on the user (programming required).

Custom Cards

- › Companies can develop their **own cards**.
- › The example shows a user's **open training courses** that are directly linked to SAP Success Factors.
- › Click on "Open" to **start the training** in a new browser window (see next slide).

VANTAiO News Manager:
Add-on for the start page

News

- > Easy integration of add-ons
- > Here is an example of the VANTAiO News Manager Card for the provision of relevant information on the start page

List Card with Top 4 Products
These are the top sellers this month

Donna Moore
Sales Executive

Content

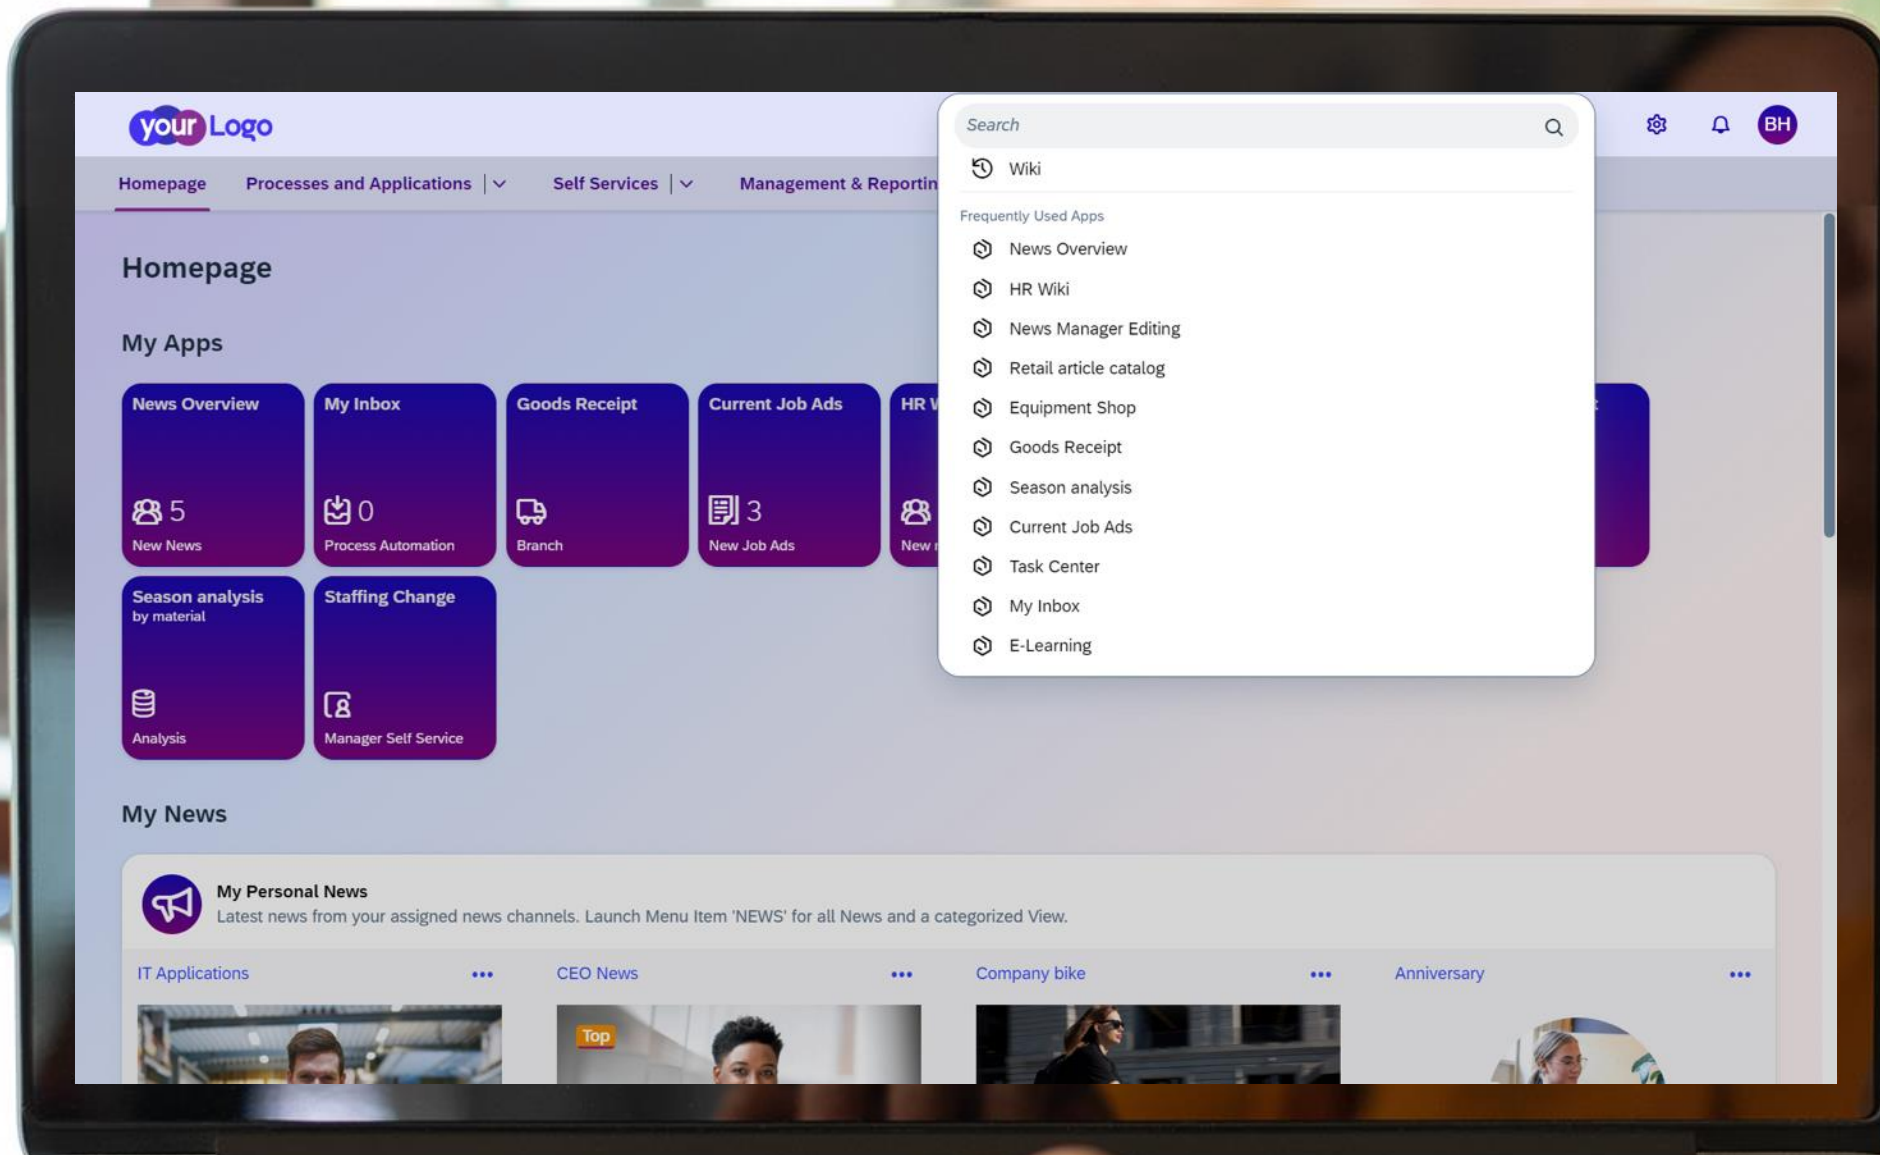

- › The content of the **VANTAiO News Manager** is flexibly customizable.
- › For example, for the provision of **HR-relevant information** on a department page (HR wiki, internal job vacancies).
- › Completely **different information objects** can also be implemented (reports, production, logistics, ...)

Content Packages

- > SAP Work Zone Standard offers the option of integrating **UI card collections** or applications.
- > This integration can be done manually or by **automatically transferring** the roles from an SAP system.

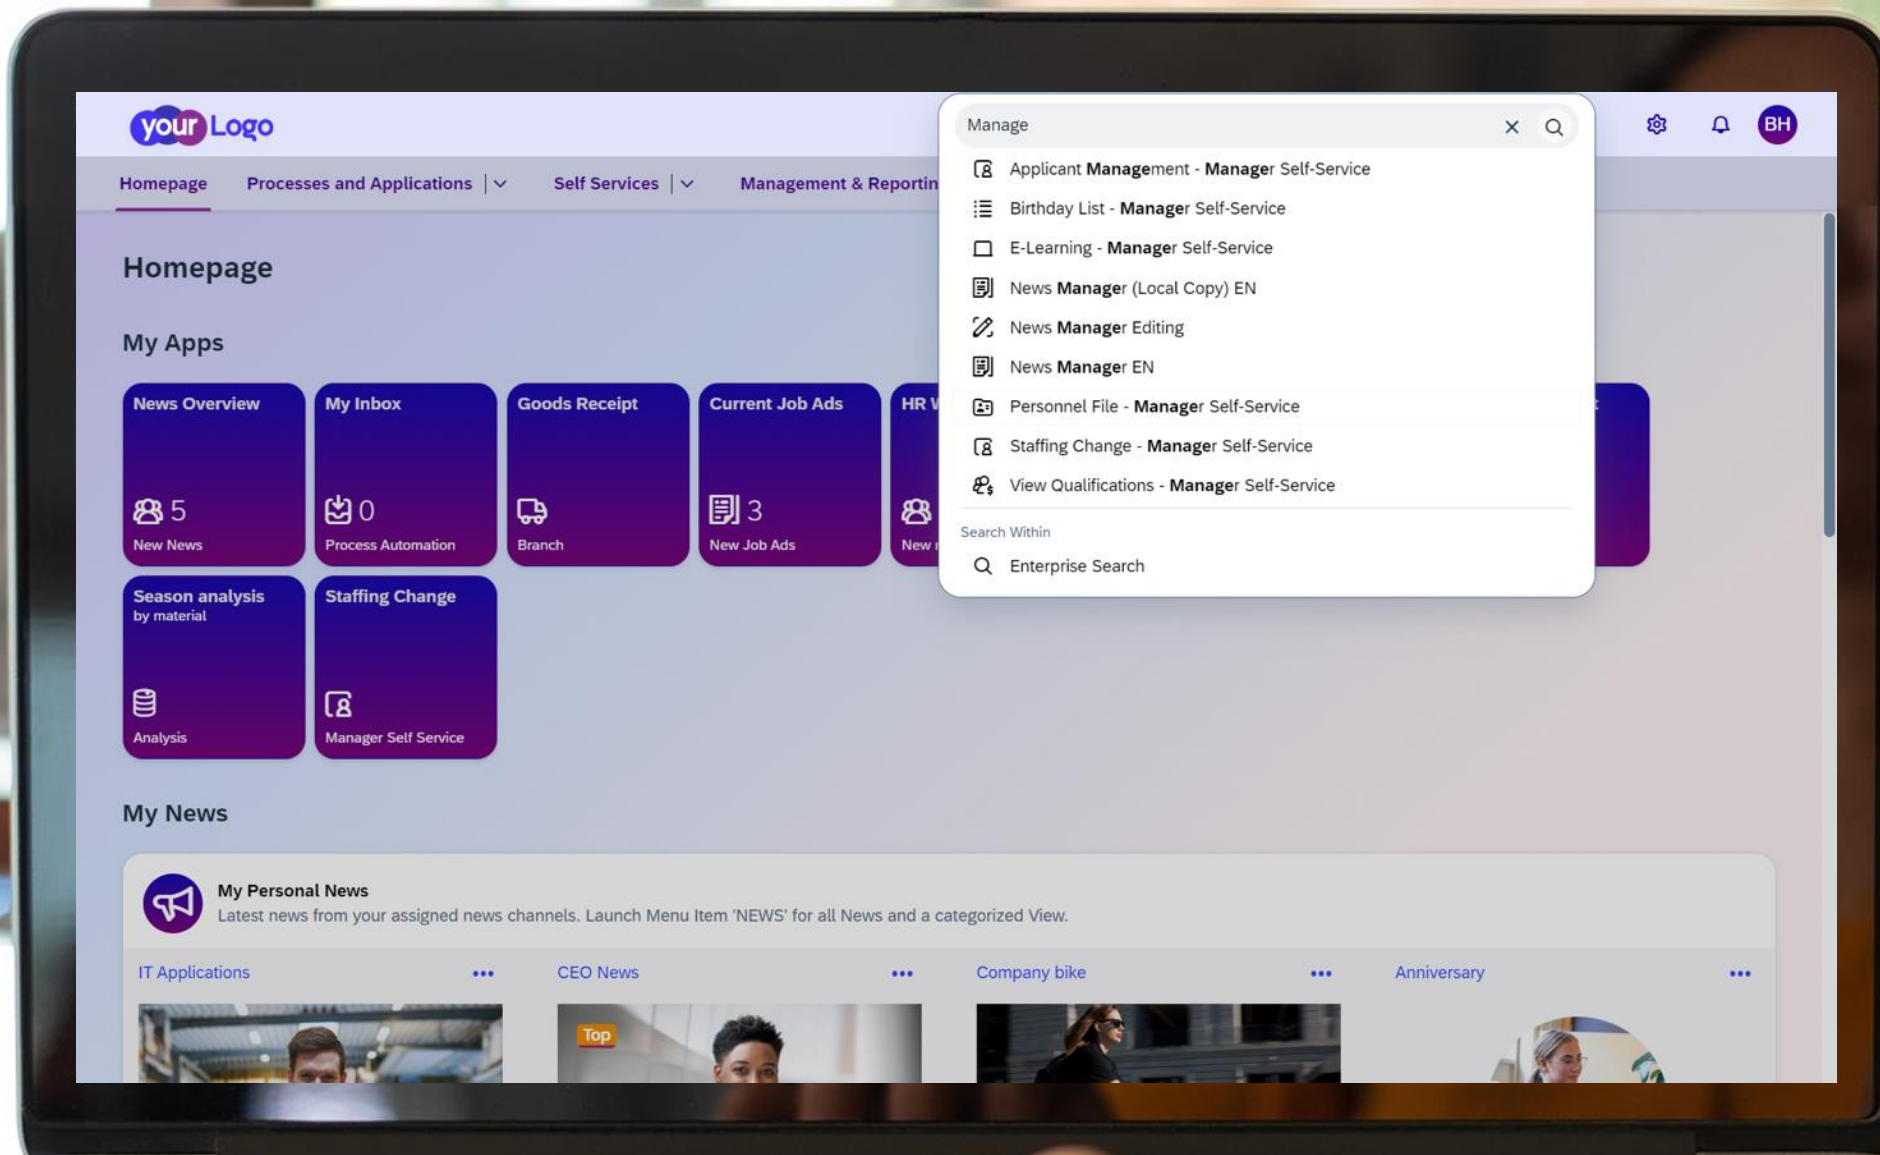

The screenshot displays the SAP Work Zone Accounts Payable dashboard. At the top, there is a navigation bar with 'your Logo' on the left and search, settings, and notification icons on the right. Below the navigation bar are menu items: 'Homepage', 'Processes and Applications', 'Self Services', and 'Management & Reporting'. The main content area is titled 'Accounts Payable' and is divided into several sections:

- Parked Invoices:** Shows an average of 77.0 days as of today. A table lists three invoices with their entry dates and amounts.
- Blocked Invoices - Chart View:** Shows a total of 167.82 k USD as of today. A bar chart displays the amount in DC by item payment reason.
- Blocked Invoices:** Shows a total of 167.82 k USD as of today. A table lists three invoices with their aging and amounts.
- Cash Discount Utilization:** Shows 27.07 k USD taken in the last 6 months, with a target of 608K and a deviation of -96%. A stacked bar chart shows lost and taken cash discounts by month.
- Days Payable Outstanding Indirect:** Shows the DPO average for the last 12 months.
- Days Payable Outstanding:** Shows the current DPO.
- Quick Links:** Includes a link to 'Manage Supplier Line Items'.
- Suppliers with Debit Balances:** A section for identifying suppliers with debit balances.

Central search

- > The search field has a **combined function**.
- > The **most frequently used applications** are displayed based on the user's usage behavior.

Manage

- Applicant Management - Manager Self-Service
- Birthday List - Manager Self-Service
- E-Learning - Manager Self-Service
- News Manager (Local Copy) EN
- News Manager Editing
- News Manager EN
- Personnel File - Manager Self-Service
- Staffing Change - Manager Self-Service
- View Qualifications - Manager Self-Service

Search Within

- Enterprise Search

Central search

- > Users can **search** for applications.
- > This is particularly helpful if the "role" or "authorization" allows access to a **large number** of applications.

SAP Build Work Zone „Advanced Edition“

How the SAP Build Work Zone
ensures more productivity in
everyday work

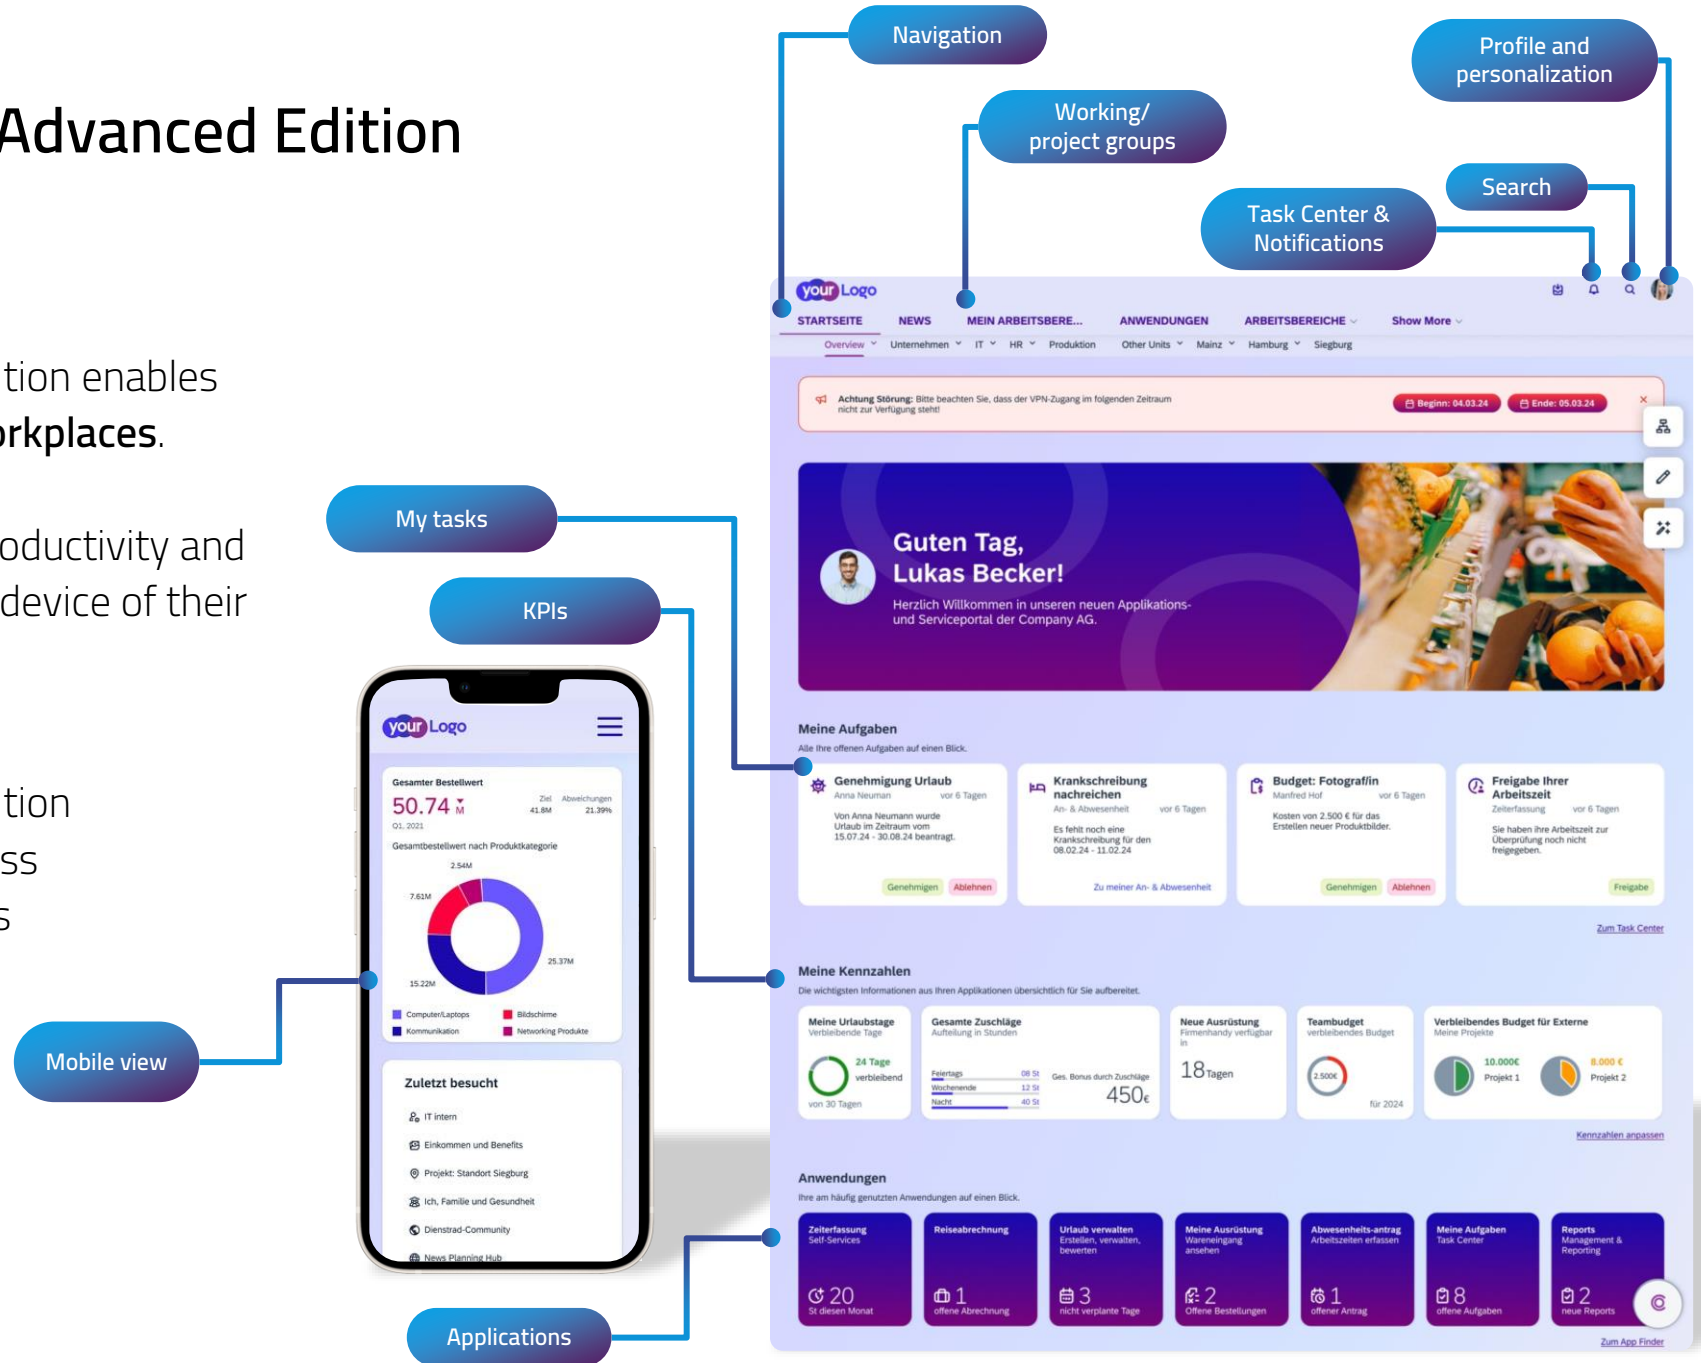

**ADVANCED
EDITION**

SAP Build Work Zone – Advanced Edition Overview

SAP Build Work Zone - Advanced Edition enables companies to easily set up **digital workplaces**.

This allows users to increase their productivity and save valuable working time with the device of their choice.

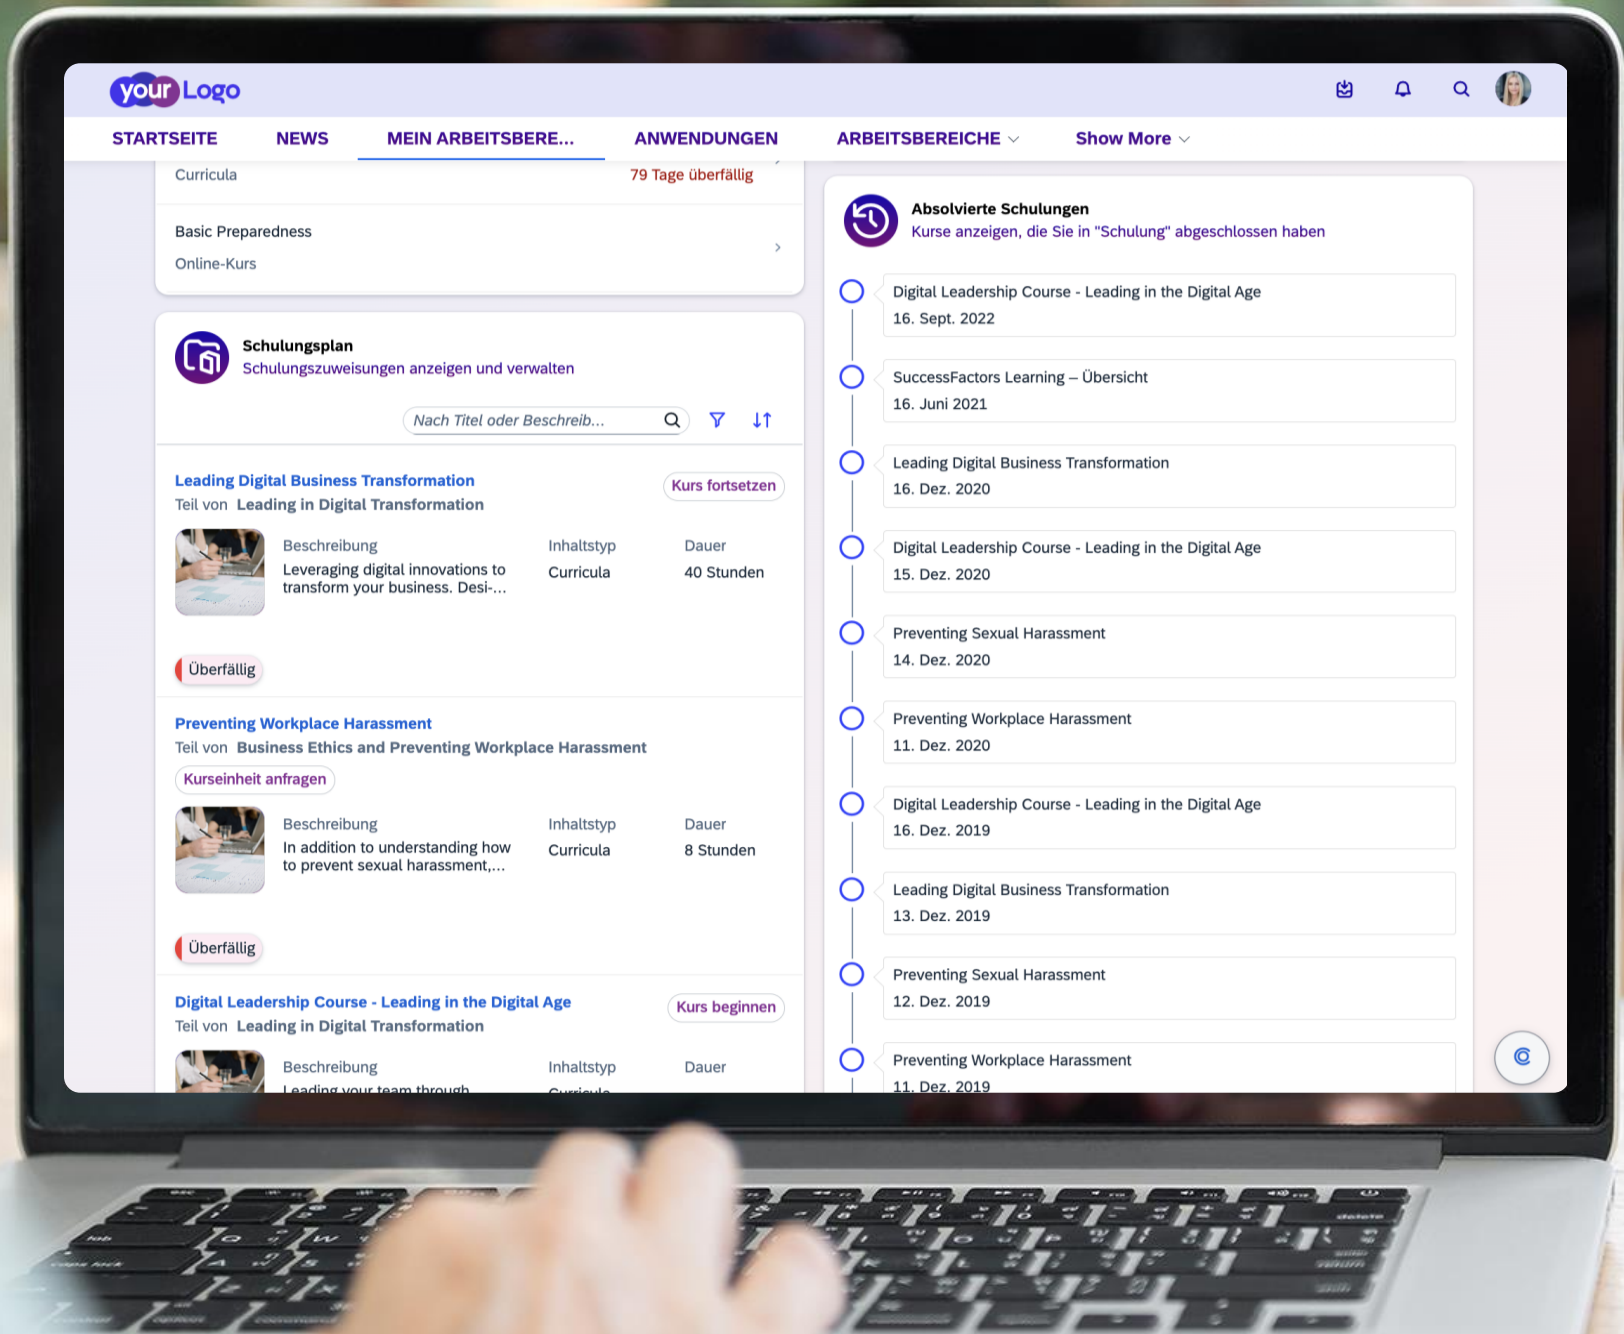

SAP Build Work Zone - Advanced Edition centralizes access to relevant business applications and processes as well as **content and communication** in a single entry point.

Home page

- > **Menu structure** is more extensive than in the standard version
- > **Inplace editing** is easily possible for authorized users at the touch of a button
- > **Logo and color scheme** customizable via theme editor or CSS, just like in the standard version
- > **Profile function** is significantly more extensive than in the standard version

Content Packages

- > Various content packages with extensive "out-of-the-box" functionalities are available for the **Advanced Edition**
- > Here you can see an example from the **content package for SuccessFactors: Process support for onboarding new employees** by providing learning units and checklists

📅 **Dienstrad Inspektionstag Frühjahr 2024**
Bettina Hildebrandt · vor etwa 11 Monaten · Dienstrad-Community

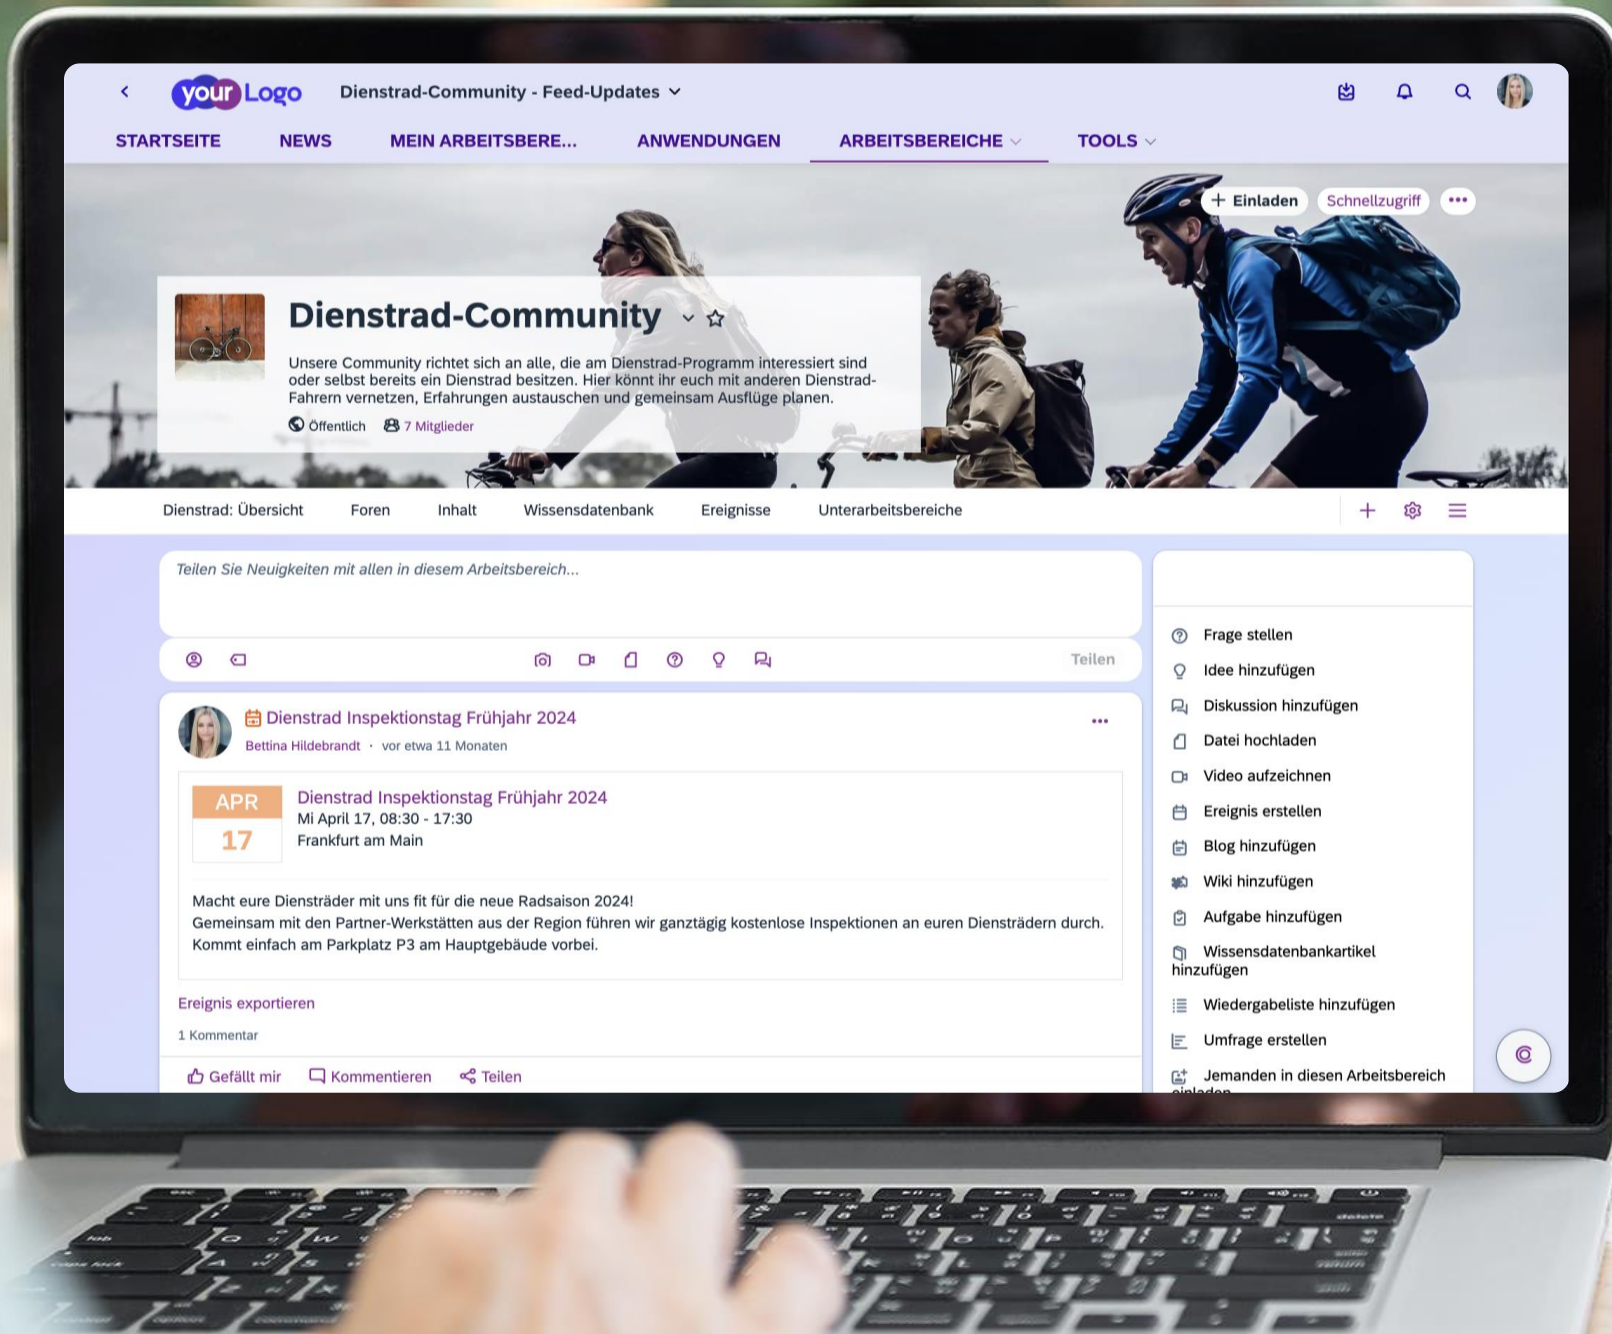

Profile

- › Extensive display and maintenance function for the personal profile
- › The profile is automatically kept up to date based on a user's activities
- › Individual maintenance of data and updating of the profile picture is comparable with the functionality from social media

Community – Overview

- › In the Advanced Edition, so-called **workspaces** can be created for specific topics (=teams)
- › A workspace can be structured and designed as desired, with its own menu items and content on the pages
- › Teams can be easily put together using the **invitation function**
- › The example shows a **company bike community** created by the HR department

Community – Contributions

- › A **workspace** in the Advanced Edition is assigned to digital work from the "red area"
- › Extensive **collaborative functions** are available in the workspaces, such as postings, questions, discussions, ideas, documents, videos, surveys and much more.
- › The structure of the pages can be customized by the owner of the respective workspace

Community – Forum topics

- › In this example workspace, **discussion forums** for the community have been provided on the second page
- › Members of the community can actively participate in discussions here or start a new forum topic
- › Additional software for discussion forums, WIKIs, exchange of ideas, etc. is no longer required, these functions are available out-of-the-box in the Advanced Edition

Dienstrad-Community

Unsere Community richtet sich an alle, die am Dienstrad-Programm interessiert sind oder selbst bereits ein Dienstrad besitzen. Hier könnt ihr euch mit anderen Dienstrad-Fahrern vernetzen, Erfahrungen austauschen und gemeinsam Ausflüge planen.

Community – Documents

- > The Advanced Edition of the SAP Build Work Zone provides a fully integrated **document management** solution that can be used anywhere
- > This example shows how the relevant **documents** on the subject of company bicycles are provided in a folder structure.

Menu editor

- > The Advanced Edition provides editors with their own menu editor, which can be used to edit the entire **menu structure** of the "Work Zone"
- > Pages / menu items can also be temporarily hidden

Widgets

- › In contrast to the Standard Edition, the Advanced Version of SAP Build Work Zone allows authorized **editors** to "install" widgets and cards on pages
- › The integrated version **management** system automatically saves versions of the pages, which can be reverted to if required
- › A large number of **widgets** are available, similar to web construction kit systems such as Joomla or Wordpress

The mobile view of the end user

How the SAP Work Build Zone
ensures more productivity in
everyday work

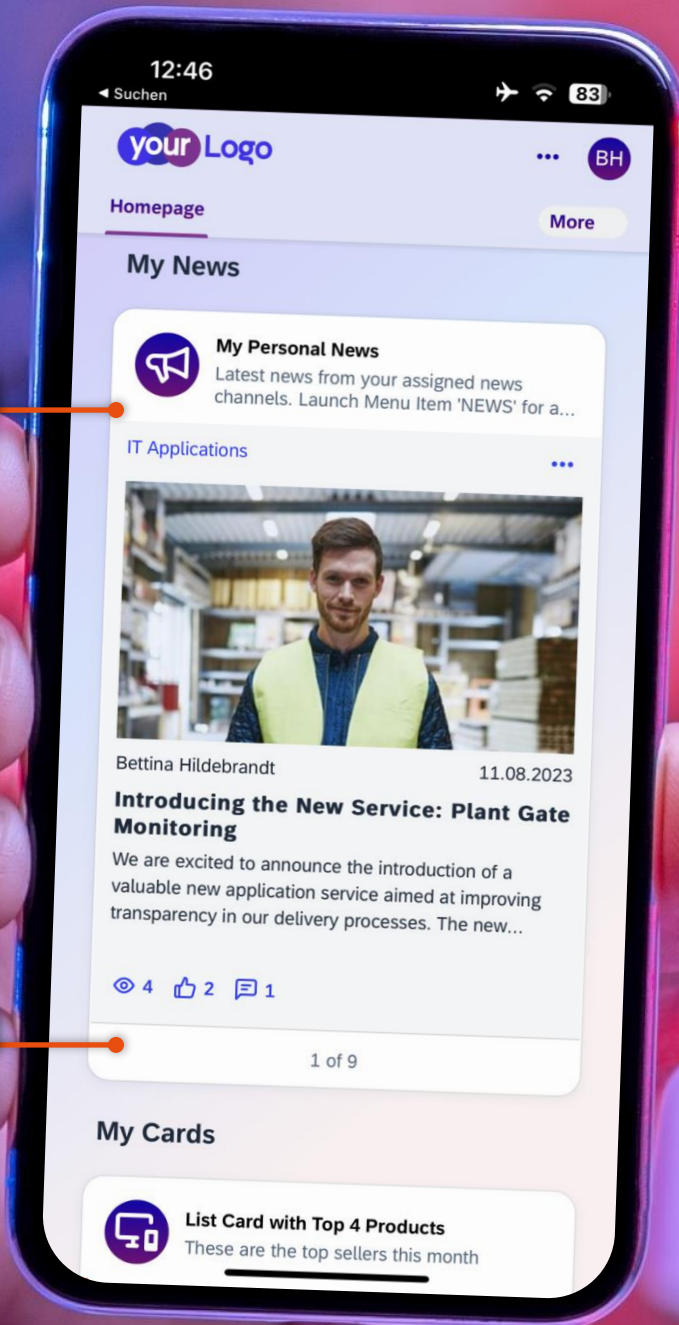

**MOBILE
VIEW**

Blueberry Design

Access via smartphone

- › Apps are displayed directly on the landing page
- › e.g. VANTAiO News Manager apps, custom Fiori apps or other apps, such as Success Factors Services
- › The system is "inherently" responsive
- › We use our new VANTAiO theme "Blueberry" here

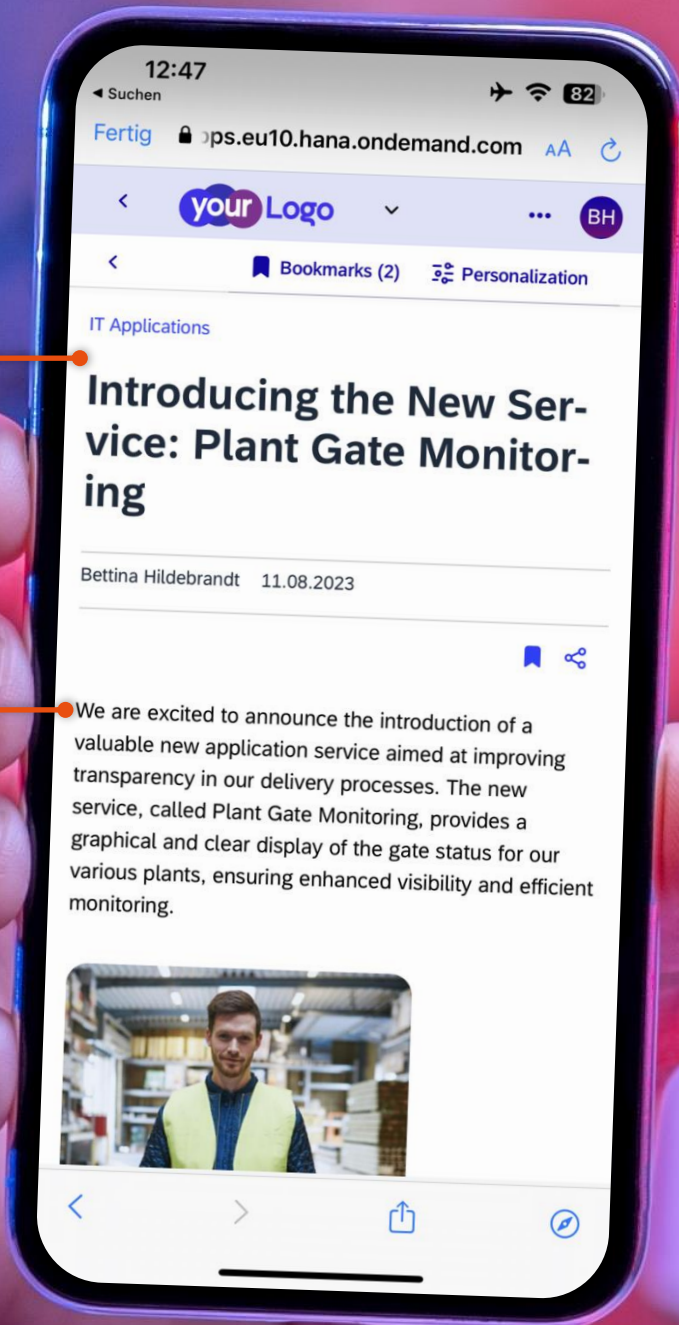

News or information card

Switch between news with a swipe

News

- > The message display is **automatically adapted** to the smartphone.
- > The click mechanism on the desktop is replaced by a **swipe gesture** to switch between messages.

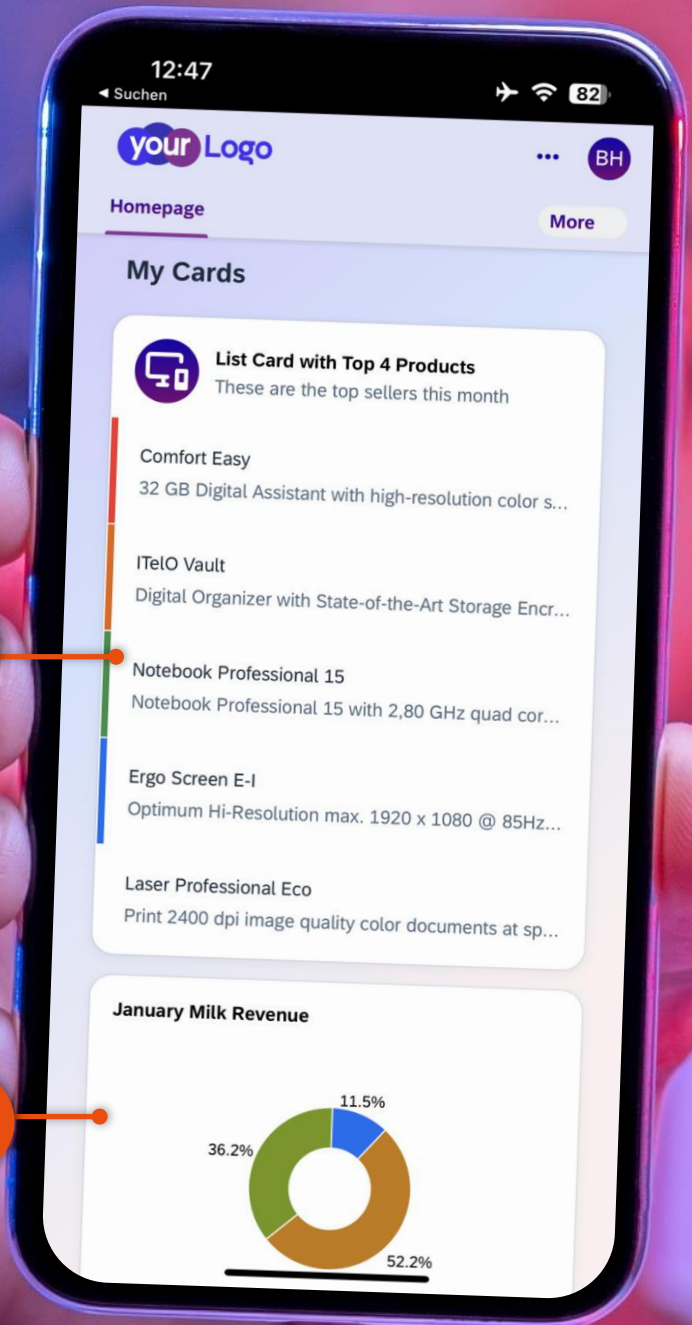

News details or article

Good readability of messages due to structure

News

- > The news view is **specially designed** for mobile use to ensure good readability.
- > For example, the **font size** can also be changed.
- > News and articles can be designed with **headlines, your own text blocks or images**.
- > This automatically ensures good **legibility**.

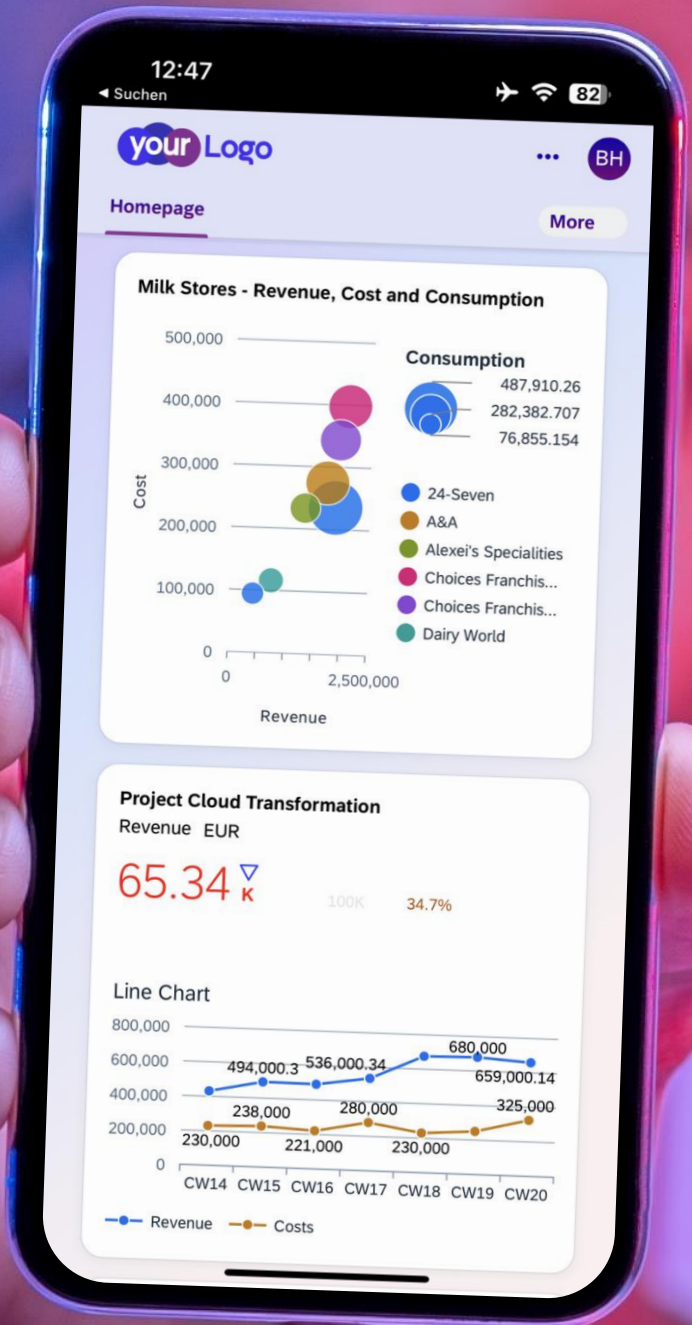

List Card

Analytical Card

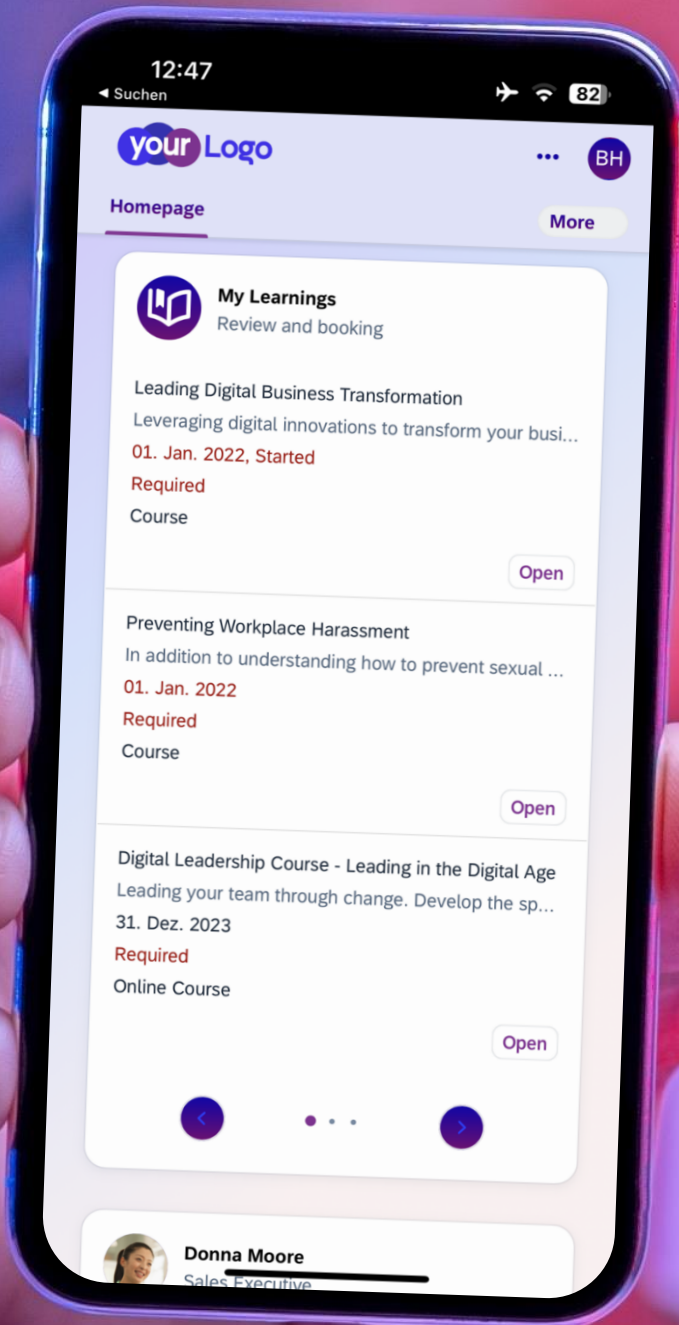

UI Cards

- > The UI Cards offered for SAP integration are also directly **compatible** with a smartphone display

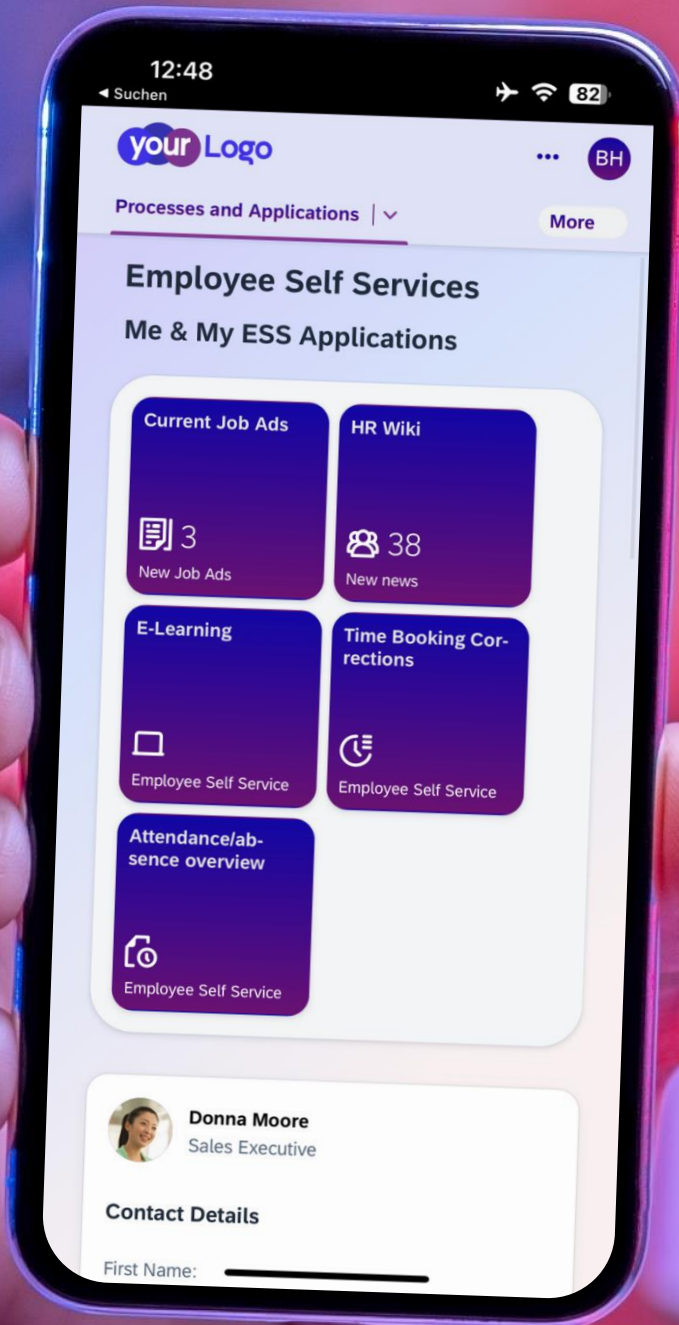

UI Cards

- > All UI cards are displayed one below the other
- > Automatic **width adjustment** for larger UI cards

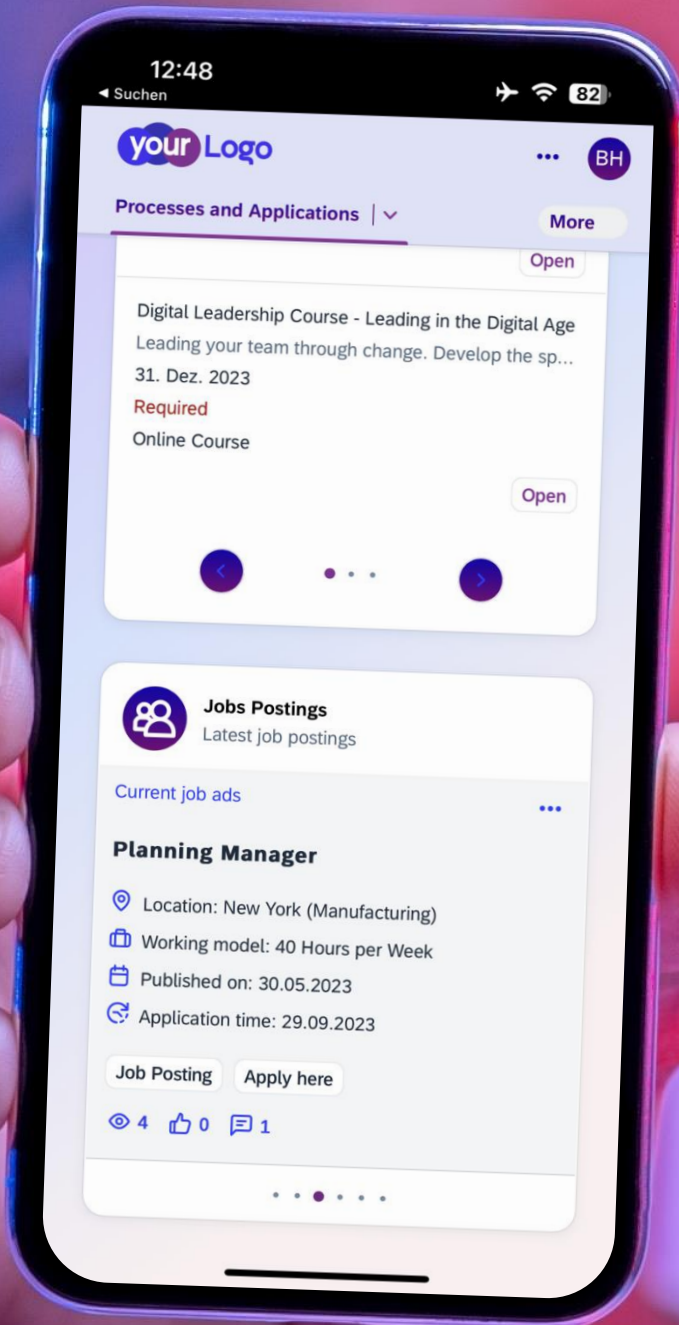

Training courses

- > This UI Card is an example of a **self-developed** card
- > The **open trainings** of a user are displayed directly

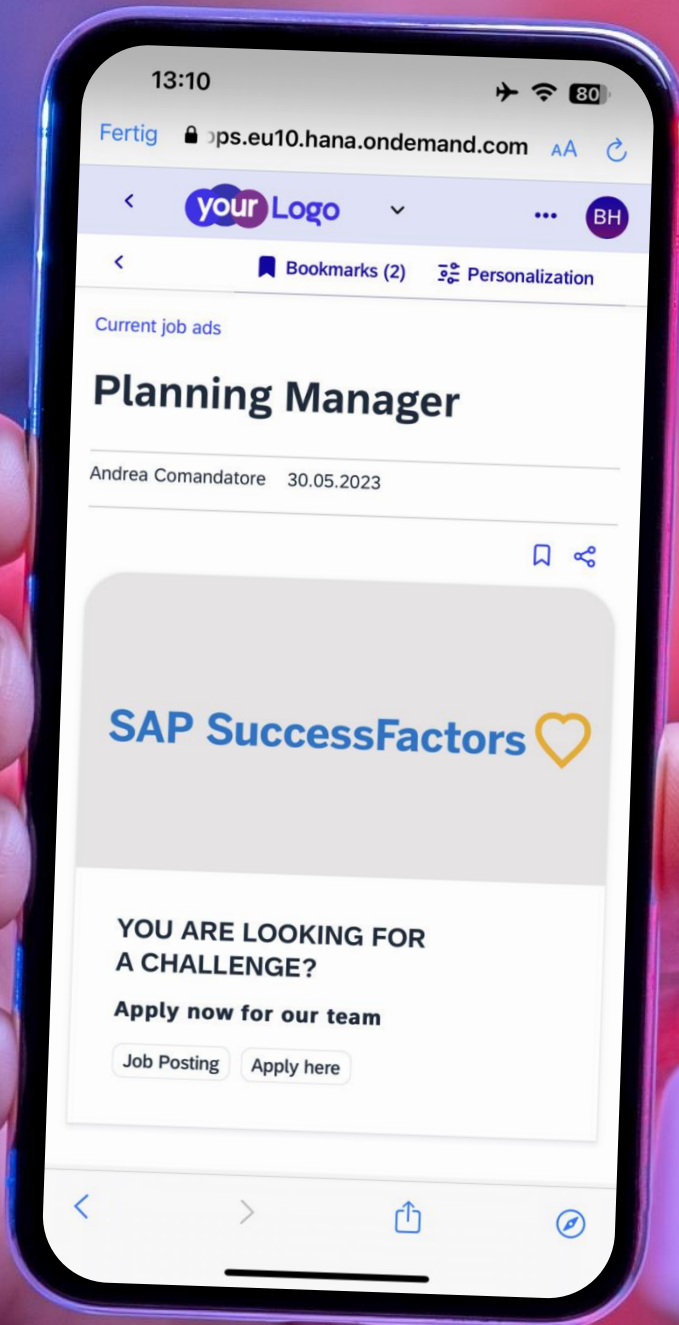

Self-Services

- > The display for other **overview pages** is analogous to the display of the homepage
- > Pages can be designed in a **mixed look** between tiles and UI cards

Job market

- > Sites can also offer special **VANTAiO News Manager Cards** to support the respective process
- > Example: **Current job advertisements** from SAP Success Factors
- > All data is **automatically read** from Success Factors and linked to the corresponding News Manager message format

Job market

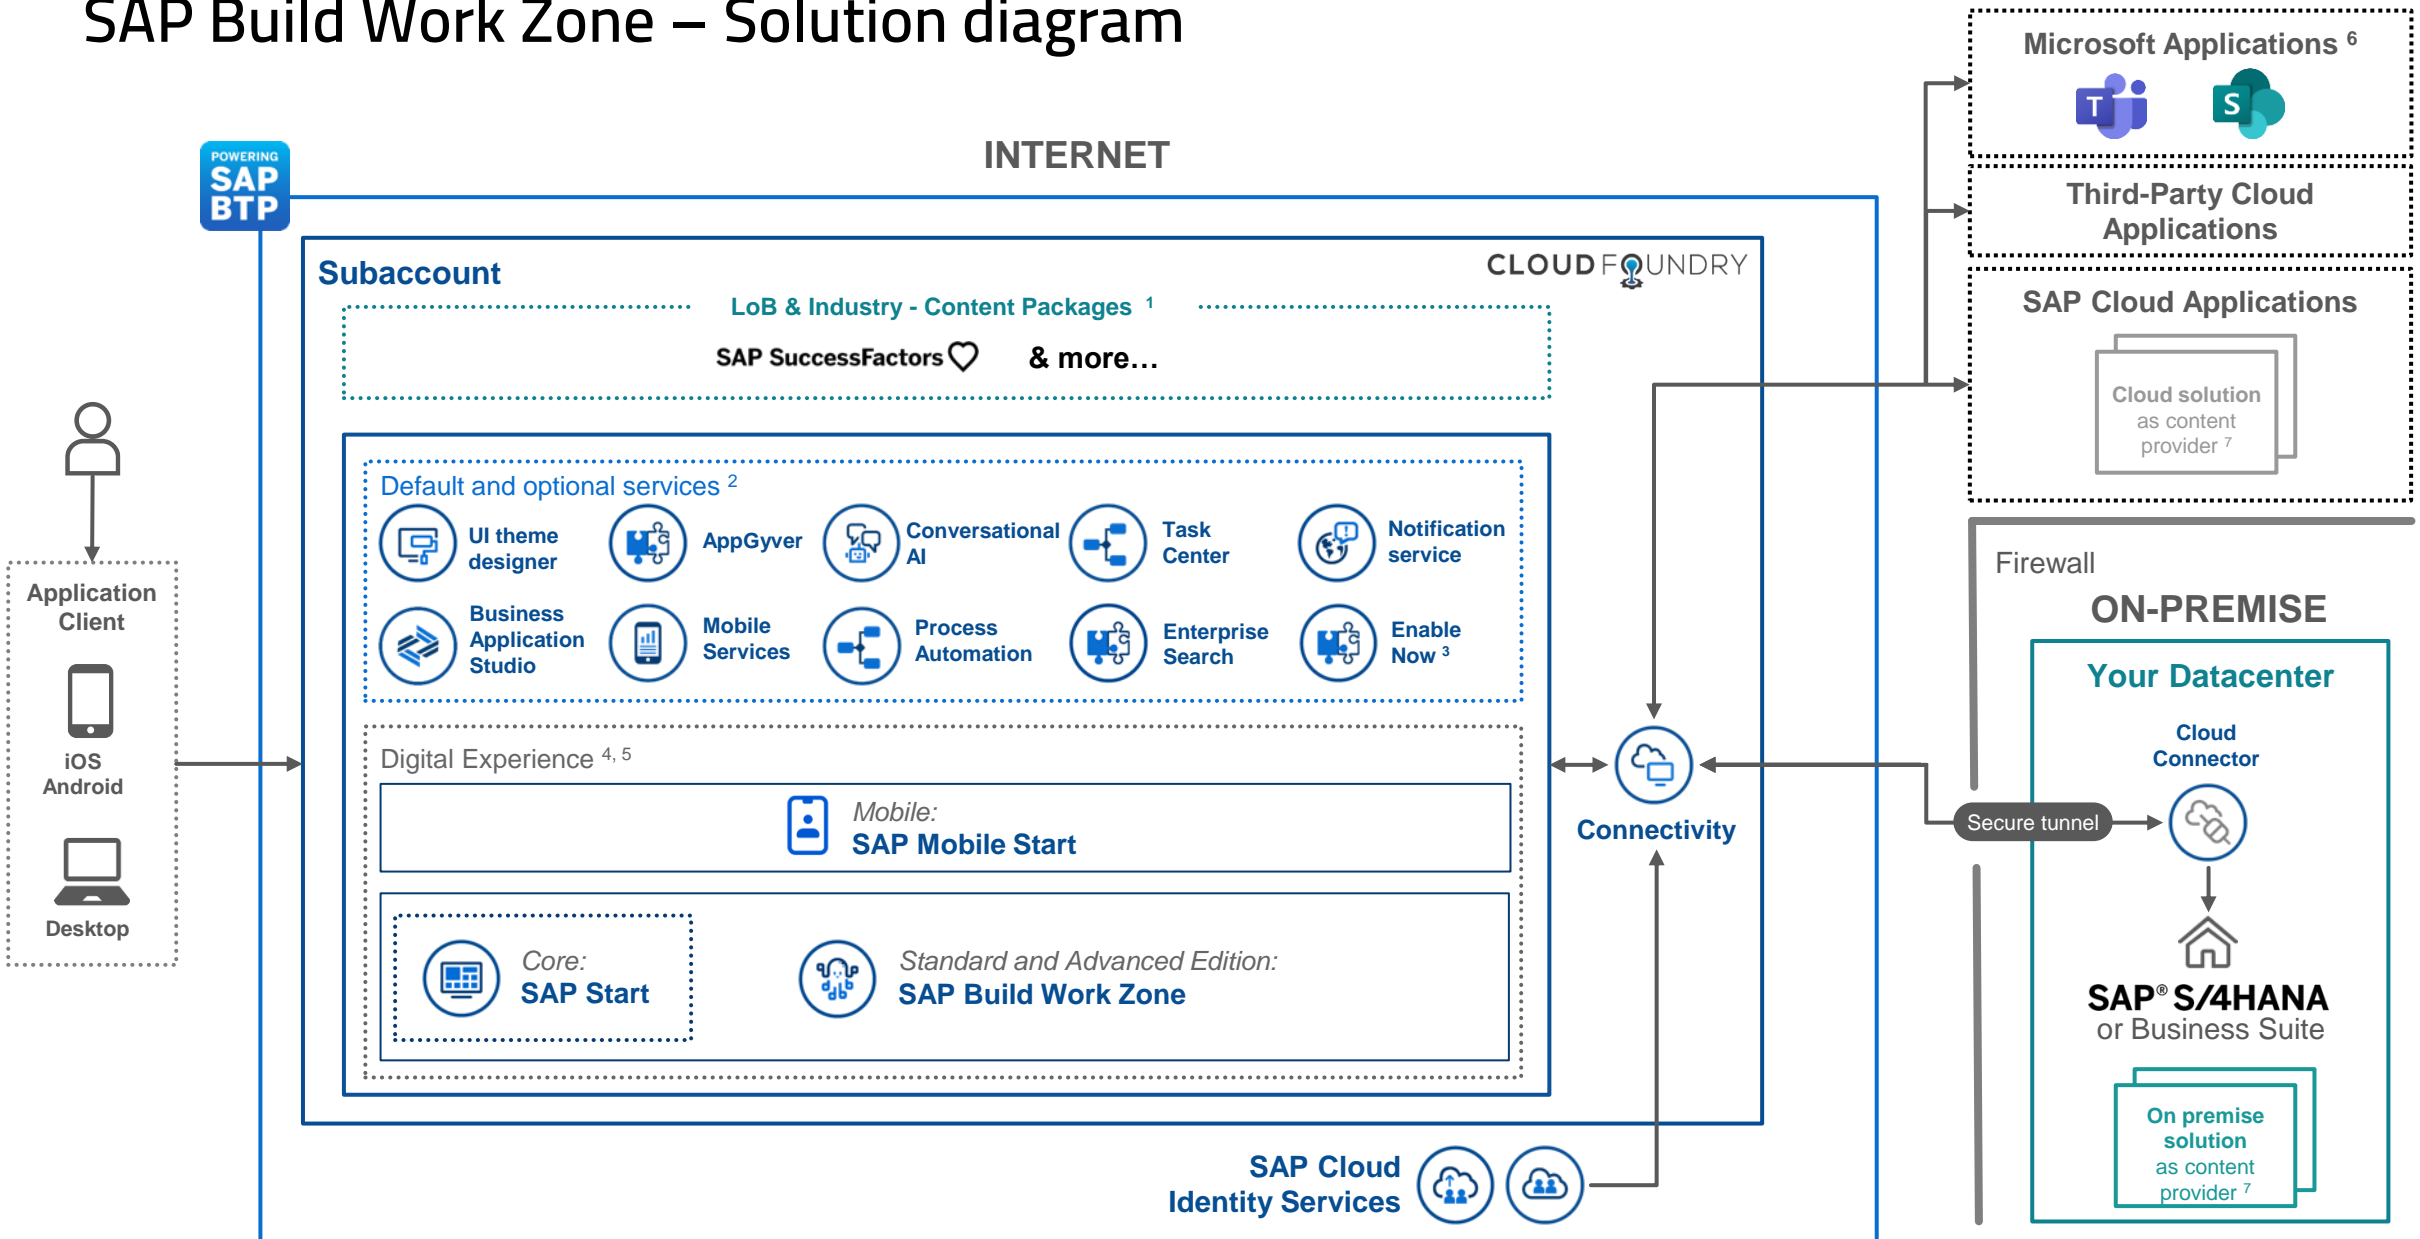

- > The display is **mobile optimized**
- > The **presentation** and **formatting** of the job advertisement can be freely defined

Summary

Architecture & comparison of functions

How SAP Work Build Zone ensures greater productivity in everyday working life

SAP Build Work Zone – Solution diagram

[1] Only SAP SuccessFactors package available today

[3] SAP Enable Now is not part of the SAP BTP Extension Suite

[5] SAP Mobile Start not yet supported for advanced

[7] [List of supported content provider systems](#)

[2] Additional licenses required for some services

[4] Advanced is a superset of standard edition

[6] Integration only supported for advanced

SAP Build Work Zone

Summarized comparison at the functional level of the two editions

This table compares the various functions of the two SAP Build Work Zone editions.

It should be noted that the two price models differ. The Advanced version offers more features, but is also approx. 2.5 times more expensive.

Nr.	Function	Standard Edition	Advanced Edition
1	Design / Theming	✓	✓
2	Navigation	—	✓
3	Personal homepage	✗	✓
4	Application integration & SSO	✓	✓
5	Content packages	—	✓
6	UI Integration Cards	✓	✓
7	Professional content pages	✗	✓
8	Content widgets	✗	✓
9	Dynamic news	✗	✗
10	Documents	✗	✓
11	Mobile use	✓	✓
12	Global search	—	—
13	Workrooms / work areas	✗	✓

✗ Not available

— Limited available

✓ Available

SAP Build Work Zone

Summarized comparison at the functional level of the two editions

SAP Build Work Zone

Standard Edition (1/2)

Nr.	Function	Rating	Comment
1	Design / Theming		Theming is possible by using the UI Theme Designer. In-depth customization is possible via CSS, but without being able to fundamentally change the design defined by the Fiori philosophy.
2	Navigation		Navigation is available, but limited to a maximum of two levels (Spaces and Pages). No expansion is currently planned here.
3	Personal homepage		Only one global start page can be defined. This is valid for all users. However, authorizations are possible, i.e. for example the display of different tiles.
4	Application integration & SSO		Integration of applications and role-based access including single sign-on.
5	Content Packages		Content packages are available to a limited extent.
6	UI Integration Cards		The Standard Edition enables the integration of custom cards, but does not contain any predefined cards for direct use. There are no (content) widgets as in the Advanced Edition. This can be partially compensated for via project work/custom cards.

SAP Build Work Zone

Summarized comparison at the functional level of the two editions

SAP Build Work Zone

Standard Edition (2/2)

Nr.	Function	Rating	Comment
7	Specialist content pages		Theming is possible by using the UI Theme Designer. In-depth customization is possible via CSS, but without being able to fundamentally change the design defined by the Fiori philosophy.
8	Content Widgets		Navigation is available, but limited to a maximum of two levels (Spaces and Pages). No expansion is currently planned here.
9	Dynamic news		Only one global start page can be defined. This is valid for all users. However, authorizations are possible, i.e. for example the display of different tiles.
10	Documents		Integration of applications and role-based access including single sign-on.
11	Mobile use		Content packages are available to a limited extent.
12	Globale search		The Standard Edition enables the integration of custom cards, but does not contain any predefined cards for direct use. There are no (content) widgets as in the Advanced Edition. This can be partially compensated for via project work/custom cards.
13	Workrooms / work areas		Theming is possible by using the UI Theme Designer. In-depth customization is possible via CSS, but without being able to fundamentally change the design defined by the Fiori philosophy.

SAP Build Work Zone

Summarized comparison at the functional level of the two editions

SAP Build Work Zone Advanced Edition (1/2)

Nr.	Function	Rating	Comment
1	Design / Theming	✓	Theming is possible by using the Theme Editor. In-depth customization is possible via CSS, but without being able to fundamentally change the basic design.
2	Navigation	✓	Limited to three levels (Menu Builder). The navigation depth can be extended by using the workspaces.
3	Personal homepage	✓	The Advanced Edition includes a personalizable page (My Workplace) for the personalization of apps, cards and content. There is also a bookmark function for content/documents. It is not possible to save and share report configuration variants.
4	Application integration & SSO	✓	Integration of applications and role-based access including single sign-on.
5	Content Packages	—	Some content packages are available for SAP products, such as Success Factors. However, these are not available for SAP HCM.
6	UI Integration Cards	✓	The Advanced Edition supports the UI Integration Cards in all variants.

SAP Build Work Zone

Summarized comparison at the functional level of the two editions

SAP Build Work Zone Advanced Edition (2/2)

Nr.	Function	Rating	Comment
7	Professional content pages	✓	Flexible design of content pages with various (content) widgets of the integrated page builder.
8	Content widgets	✓	In addition to the tiles and cards (with predefined LOB content), the Advanced Edition also contains various content widgets for maintaining content on a Work Zone page.
9	Dynamic news	✗	The Advanced Edition does not include news management. This functionality can be compensated by the VANTAiO News Manager add-on.
10	Documents	✓	The Advanced Edition includes integrated document management with document preview and a wide range of functions.
11	Mobile use	✓	Native SAP Build Work Zone app for iOS and Android.
12	Globale search	–	Standard search finds Work Zone Web content/documents, Enterprise Search for S/4HANA business objects can be integrated as an option. The search cannot be extended to include custom or external content.
13	Workrooms / work areas	✓	Comprehensive options for providing public and private workspaces based on various templates.

Thank you for your interest.
